

DailyMealBox

PRODUCT REQUIREMENTS DOCUMENT

Part 2 — Vendor / Maker App · FINAL

Document	FINAL merged — supersedes all previous Vendor App versions
Version	v3.0 Final
Date	22 May 2026
Platforms	Android + iOS (React Native)
Users	Home Cooks · Cloud Kitchens · Restaurants · Catering Companies
Brand	#1F7A63 Deep Green · #F5F5F0 Soft Beige · #2B2B2B Dark Gray
Developer	Appzeto — Indore, India

1. App Overview

The Vendor App is used by all meal providers: home cooks, cloud kitchens, restaurants, and catering companies. Key principle: all deliveries are handled by fleet partners — vendors NEVER self-deliver. Vendor role is: prepare food, mark ready, hand to driver. Everything else is handled by the platform.

1.1 Navigation — 5 Tab Bar

 Home	 Orders	 Menu	 Earnings	 More
Dashboard, alerts, forecast, ingredient plan, OTA banner	Today orders, preparation status board	Meals, nutrition, schedule, flash deals, surprise boxes	Wallet, VAT settlement, payouts, revenue forecast	Subscribers, analytics, featured listing, profile

2. Push Notification Catalogue — Vendor App (Complete)

All push notifications use Firebase Cloud Messaging (FCM). Every notification type is listed below with its trigger, text, channel, and admin control. Admin (Marketing Manager / Super Admin) can enable/disable each type via Admin Controls Matrix (ACM-27). OTP and legal notifications cannot be disabled.

Trigger Event	Notification Text	Recipient	Channel	Admin Control
Vendor application approved	Your kitchen is live! Welcome to DailyMealBox. Tap to complete your menu setup.	Vendor	FCM + Email	ACM-50 — cannot disable
Vendor application rejected	Your application was not approved. Reason: [reason]. Tap to resubmit.	Vendor	FCM + Email	ACM-50 — cannot disable
New subscriber joined	New subscriber! Anna K. from Centrum joined your plan.	Vendor	FCM Push	ACM-27 — admin can disable
Subscriber cancelled	A subscriber cancelled. Check your analytics for retention tips.	Vendor	FCM Push	ACM-27 — admin can disable
New order received (one-time)	New order from Centrum! Piotr M. ordered Rosol for tomorrow lunch.	Vendor	FCM Push	ACM-27 — admin can disable
Tomorrow order forecast ready	Tomorrow forecast ready: 19 orders expected. Rosol x14, Pierogi x10. Tap to see full plan.	Vendor	FCM Push	ACM-30 — time configurable per maker type
Cutoff approaching (2h warning)	Lunch cutoff in 2 hours (10:00). Accept orders and prepare your kitchen.	Vendor	FCM Push	ACM-27 — admin can disable
Driver assigned for pickup	Driver Jan W. (e-bike) assigned. Arrives ~11:45 for 22 boxes. Have orders ready with PIN.	Vendor	FCM Push	ACM-27 — cannot disable (ops critical)
Batch collected by driver	Batch A collected by Jan W. at 11:52. 8 boxes. PIN verified successfully.	Vendor	FCM Push	ACM-27 — admin can disable
Flash deal approved by admin	Your flash deal is live! Rosol 20% off — active until 14:00 today.	Vendor	FCM Push	ACM-41 — cannot disable
Flash deal rejected by admin	Flash deal rejected. Reason: [reason]. Edit and resubmit.	Vendor	FCM Push	ACM-41 — cannot disable
Payout processed	2,480 PLN sent to your bank account. Arrives by next business day.	Vendor	FCM + Email	ACM-52 — cannot disable
Food licence expiring soon	Your EU food licence expires in 30 days. Upload renewal to avoid suspension.	Vendor	FCM + Email	ACM-49 — cannot disable (legal)
Food licence expired — suspended	Your account is suspended. Food licence expired. Upload renewal to reactivate.	Vendor	FCM + Email	ACM-49 — cannot disable (legal)

Customer complaint filed	A customer complaint was filed for order #DMB-009. CS team is reviewing.	Vendor	FCM Push	ACM-27 — admin can disable
Subscriber skip notification	Anna K. skipped tomorrow delivery. Update your preparation count.	Vendor	FCM Push	ACM-27 — admin can disable
Vacation mode activated	Your vacation mode is active 15–22 Jul. 34 subscribers paused and notified.	Vendor	FCM + Email	Auto — cannot disable
Kitchen returns from vacation	Welcome back! Your subscription resumes today. 19 orders expected.	Vendor	FCM Push	Auto — cannot disable
Commission rate changed	Your commission rate has been updated to 18%. Effective from next billing cycle.	Vendor	FCM + Email	ACM-51 — cannot disable

FCM Payload Examples — Vendor Notifications

```
// Example 1: New subscriber joined
FCM.send(vendor.device_token, {
  title: "New subscriber! 🎉",
  body: "Anna K. from Centrum joined your Healthy Weekly plan.",
  data: {
    screen: "subscribers",          // deep link
    subscriber_id: "user_anna_123",
    event: "new_subscriber"
  },
  android: { priority: "high", notification: { sound: "default" } },
  apns: { payload: { aps: { sound: "default", badge: 1 } } }
})

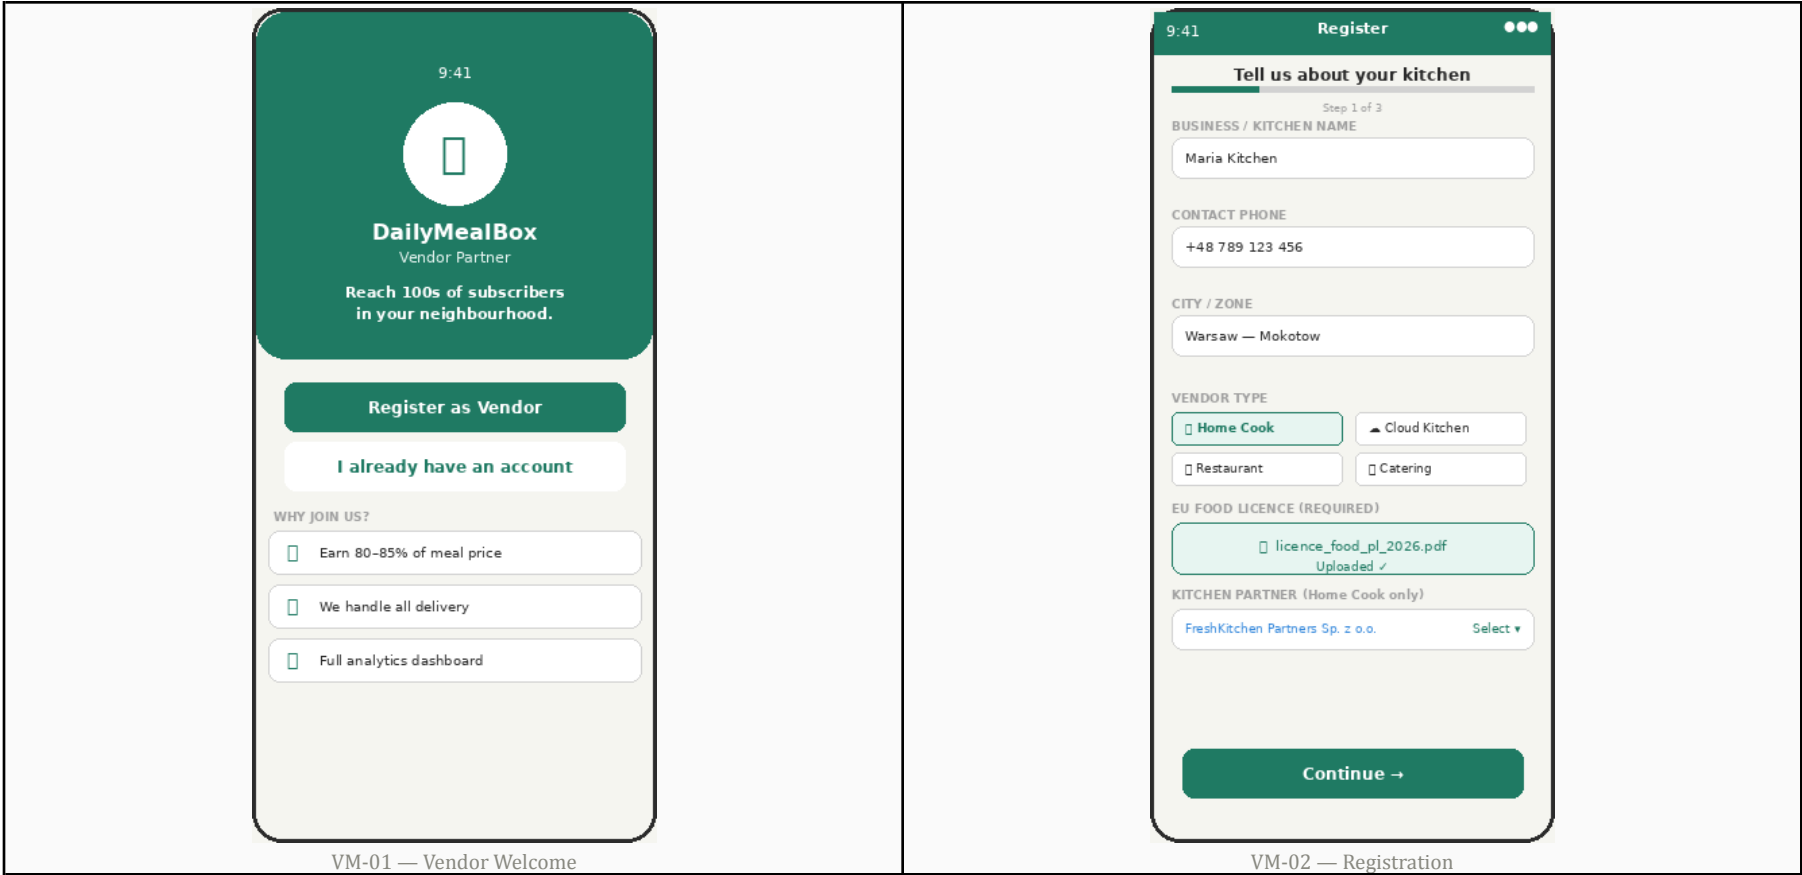

// Example 2: Driver assigned for pickup (CRITICAL — cannot be disabled)
FCM.send(vendor.device_token, {
  title: "Driver assigned for pickup 🚚",
  body: "Jan W. (e-bike ★4.9) arrives ~11:45. Prepare 22 boxes. Have PIN ready.",
  data: {
    screen: "delivery_assignment",
    driver_id: "driver_jan_123",
    driver_name: "Jan Wisniewski",
    driver_vehicle: "ebike",
    eta_time: "11:45",
    box_count: 22,
    event: "driver_assigned"
  }
})
```

```
// Example 3: Tomorrow forecast ready (configurable time per maker type)
// Triggered by CRON at admin-configured time (default: home_cook=19:00, restaurant=20:00)
FCM.send(vendor.device_token, {
  title: "Tomorrow forecast ready 📅",
  body: "19 orders expected. Rosol x14, Pierogi x10. Tap to see ingredient plan.",
  data: {
    screen: "forecast",
    date: "2026-05-13",
    total_expected: 19,
    event: "forecast_ready"
  }
})

// Example 4: Flash deal approved
FCM.send(vendor.device_token, {
  title: "Flash deal is live! 🔥",
  body: "Rosol 20% off – active now until 14:00. Customers can see it.",
  data: {
    screen: "flash_deals",
    deal_id: "deal_123",
    event: "flash_deal_approved"
  }
})

// Example 5: Payout processed
FCM.send(vendor.device_token, {
  title: "Payment sent to your bank 💰",
  body: "2,480 PLN transferred to PL61****. Arrives by next business day.",
  data: {
    screen: "earnings",
    amount_pln: 2480,
    event: "payout_processed"
  }
})
```

3. Vendor Onboarding & Registration

VM-01	Vendor Welcome Screen	✓ INCLUDED	v1.0
-------	-----------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
DailyMealBox Vendor branding + 3 value propositions	✓ INCLUDED	—	Earn 80-85% of meal price / Delivery handled / Full analytics.

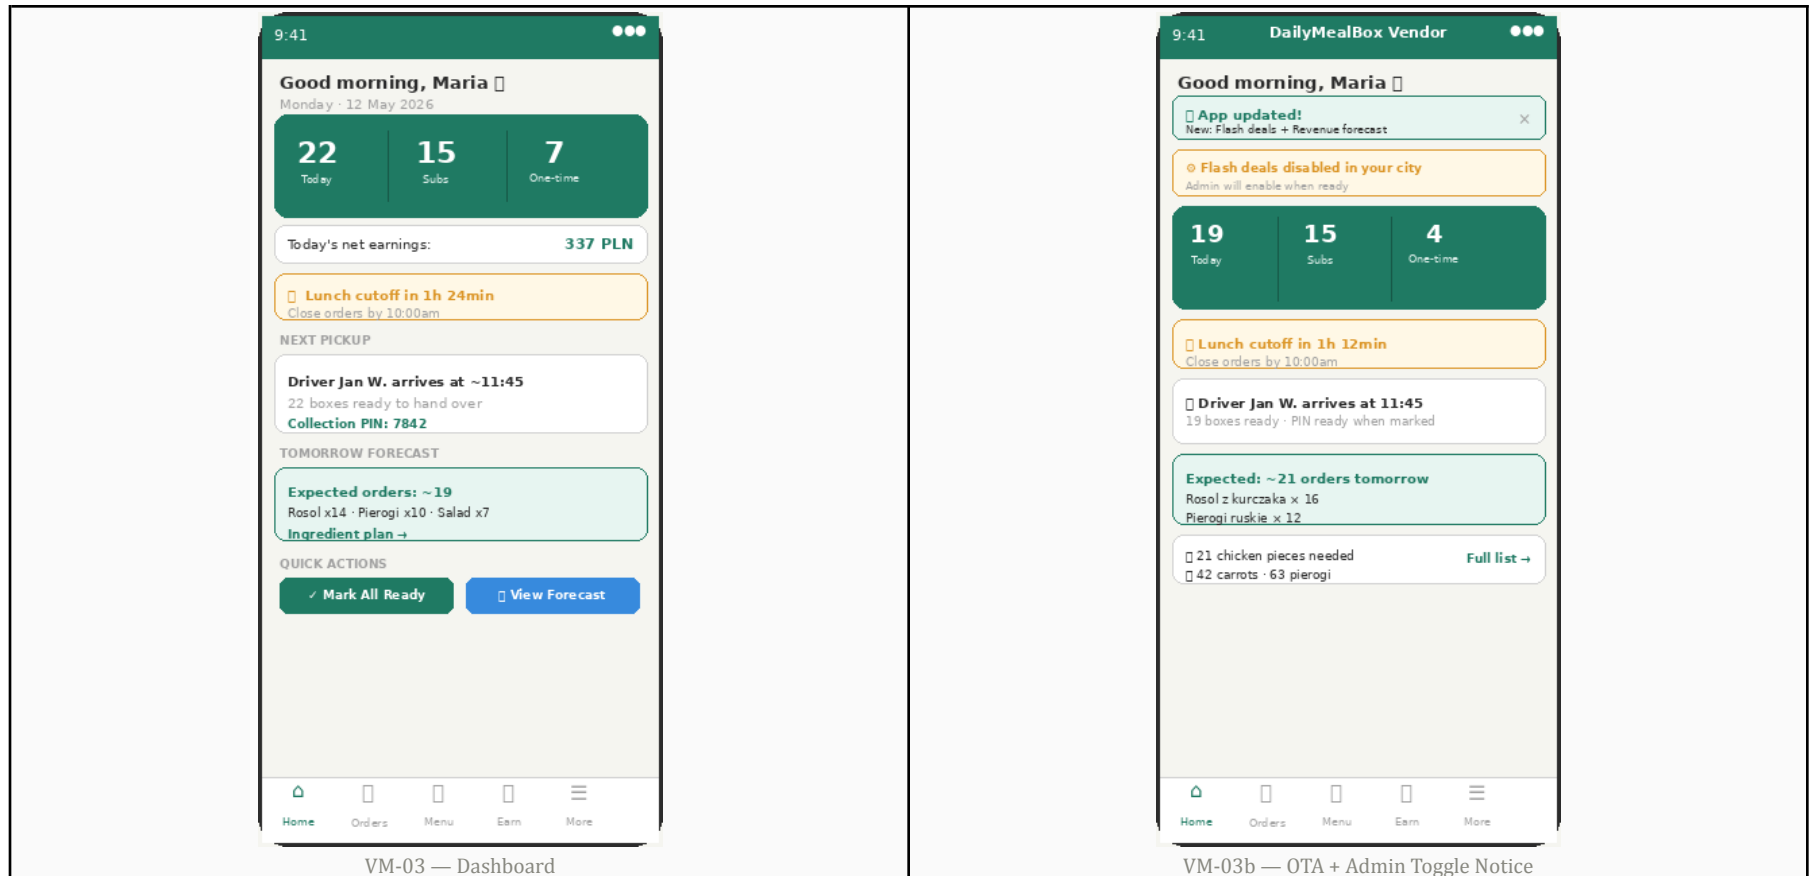

Register CTA → VM-02	✓ INCLUDED	—	Starts registration flow.
Log in → vendor dashboard	✓ INCLUDED	—	For returning vendors.
Admin can pause new vendor registrations per type	⚙ ADMIN	ACM-47	Per city / per vendor type / platform-wide.

VM-02	Business Registration	✓ INCLUDED	v1.0 + v3.0
-------	-----------------------	------------	-------------

Home cooks without a registered company must be linked to a Kitchen Partner company before going live. This is new in v3.0. The registration form detects vendor type "Home Cook" and shows the Kitchen Partner linking step.

Feature	Status	Admin Control	Notes / Logic
Business/kitchen name, phone, city, zone, vendor type	✓ INCLUDED	ACM-47/48	4 types: Home Cook, Cloud Kitchen, Restaurant, Catering.
EU food business licence upload — MANDATORY	✓ INCLUDED	ACM-49 (law)	Google Drive storage. Cannot go live without. 30-day expiry warning.
Owner ID document upload	✓ INCLUDED	—	EU compliance. MISSING — must add to Appzeto scope.
Bank IBAN for payouts	✓ INCLUDED	—	IBAN validation on input.
Kitchen Partner linking (Home Cook only) — NEW v3.0	✓ INCLUDED	—	If vendor_type = home_cook AND no company: must select Kitchen Partner from approved list. Kitchen Partner handles all invoicing and VAT.
VAT number (for restaurant/cloud kitchen/catering)	💬 CONFIRMED	WhatsApp 11 Apr	Vendors with own company enter NIP/VAT number. Used on settlement statements.
Admin approval workflow	✓ INCLUDED	ACM-50	Pending → Approved/Rejected. Push + email notification.
Push: approved/rejected with reason	✓ INCLUDED	ACM-50	FCM + Email. Cannot disable. See notification catalogue Section 2.

4. Home Dashboard

VM-03 Vendor Dashboard — Home Tab

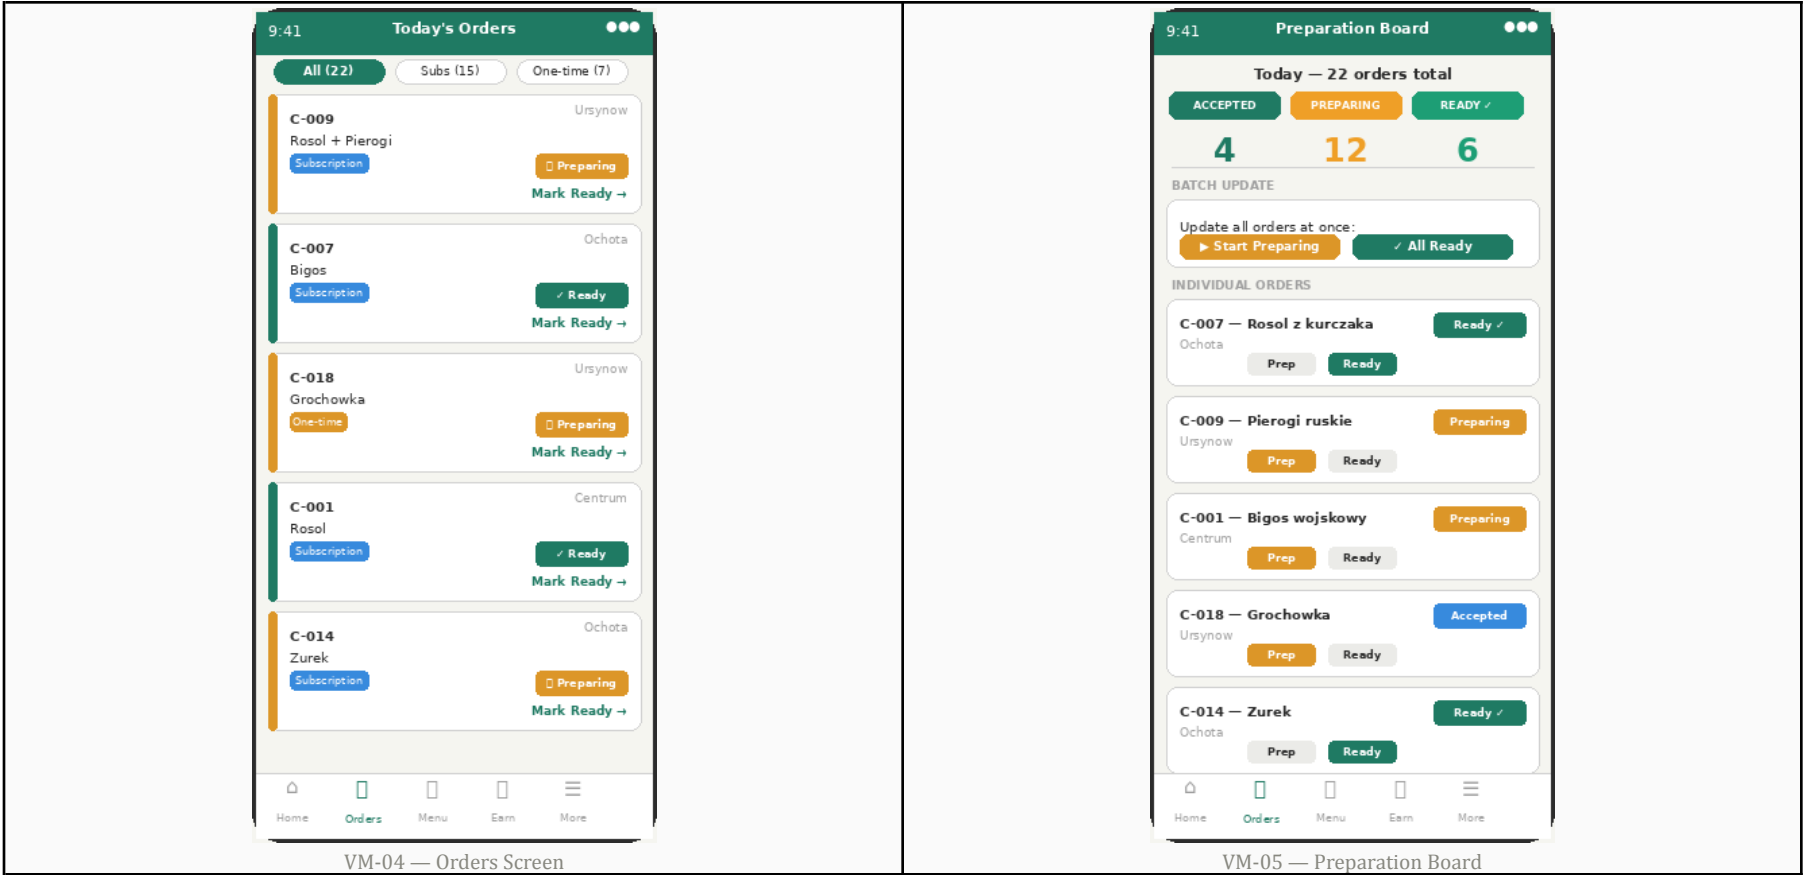

✓ INCLUDED

v1.0 + v2.0 + v3.0

Everything the vendor needs for today on one screen without scrolling. OTA banner appears when admin pushes a new feature. Admin-disabled features show amber notice — vendor never sees a broken button.

Feature	Status	Admin Control	Notes / Logic
Today order count (total / subscription / one-time)	✓ INCLUDED	—	3 stats in prominent green card. Real-time.
Today net earnings estimate (after commission + VAT)	✓ INCLUDED	—	NEW v3.0: Shows net after 15% commission AND shows food VAT (8%) separately.
Cutoff countdown alert (amber — disappears after cutoff)	✓ INCLUDED	ACM-55/56/57	Admin sets cutoff per maker type.
Next driver pickup card (driver name, ETA, box count)	✓ INCLUDED	—	Push notification sent when driver assigned — see notification catalogue.
Tomorrow forecast card + ingredient planning shortcut	💬 CONFIRMED	ACM-30/WhatsApp 11 Apr	Push at admin-configured time per maker type.
OTA update banner (non-intrusive, dismissable)	✓ INCLUDED	—	Green banner when admin pushes update.
Admin-disabled feature notice (amber)	✓ INCLUDED	ACM toggles	If flash deals disabled in city: amber banner explains.
Mark all ready button → generates collection PINs + driver FCM push	✓ INCLUDED	—	CRITICAL: push to driver with vendor address, box count, PIN.
New subscriber push notification	✓ INCLUDED	ACM-27	Push when new subscriber joins. See notification catalogue.

5. Order Management

VM-04	Orders Screen	✓ INCLUDED	v1.0
-------	---------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Filter tabs: All / Subscription / One-time (count per tab)	✓ INCLUDED	—	

Order card: customer alias, zone, meal, type badge, status	✓ INCLUDED	—	Never shows customer real name — alias only.
Accept/reject one-time orders	✓ INCLUDED	—	Subscription = auto-accepted.
Customer special instructions on order card	✓ INCLUDED	—	e.g. "no onions" — MISSING. Must add.
Push: new one-time order received	✓ INCLUDED	ACM-27	FCM push to vendor. See notification catalogue.
Push: subscriber skip notification	✓ INCLUDED	ACM-27	Vendor knows to reduce prep count.

VM-05	Preparation Status Board	✓ INCLUDED	v1.0 + v3.0
-------	--------------------------	------------	-------------

CRITICAL: MOST CRITICAL CROSS-APP DEPENDENCY: When vendor marks "All Ready", system must (1) generate collection PIN per batch, (2) FCM push to assigned driver with vendor address + box count + PIN. Without this, driver coordination requires phone calls every day.

Feature	Status	Admin Control	Notes / Logic
3 named statuses: Accepted → Preparing → Ready for Pickup	✓ INCLUDED	—	Explicit names. Each triggers downstream actions.
Batch update: Start Preparing / All Ready	✓ INCLUDED	—	One tap updates all orders.
Individual status change per order	✓ INCLUDED	—	
Collection PIN generation on mark-ready	✓ INCLUDED	—	4-digit PIN per batch. Redis, 2h expiry, single-use. MISSING.
Driver FCM push on Ready for Pickup	✓ INCLUDED	—	FCM to driver: vendor name, address, box count, PIN. MISSING — most critical.
Status history log per order (timestamps)	✓ INCLUDED	—	Used for admin dispute resolution.

Preparation Status → Collection PIN → Driver Push

```
// Vendor taps "Mark All Ready":
PATCH /api/orders/bulk/status { vendor_id, status:"ready_for_pickup" }

Backend:
1. UPDATE all orders for vendor today → preparation_status = "ready_for_pickup"
2. Log timestamp per order in status_history

3. Generate collection PIN per pickup batch:
const batches = groupOrdersByPickupTime(orders)
batches.forEach(async batch => {
  const pin = Math.floor(1000 + Math.random() * 9000)
  await redis.set("collection_pin:"+batch.id, pin, "EX", 7200) // 2h expiry
  batch.collection_pin = pin
})

4. FCM push to assigned driver (CRITICAL — cannot be disabled):
```

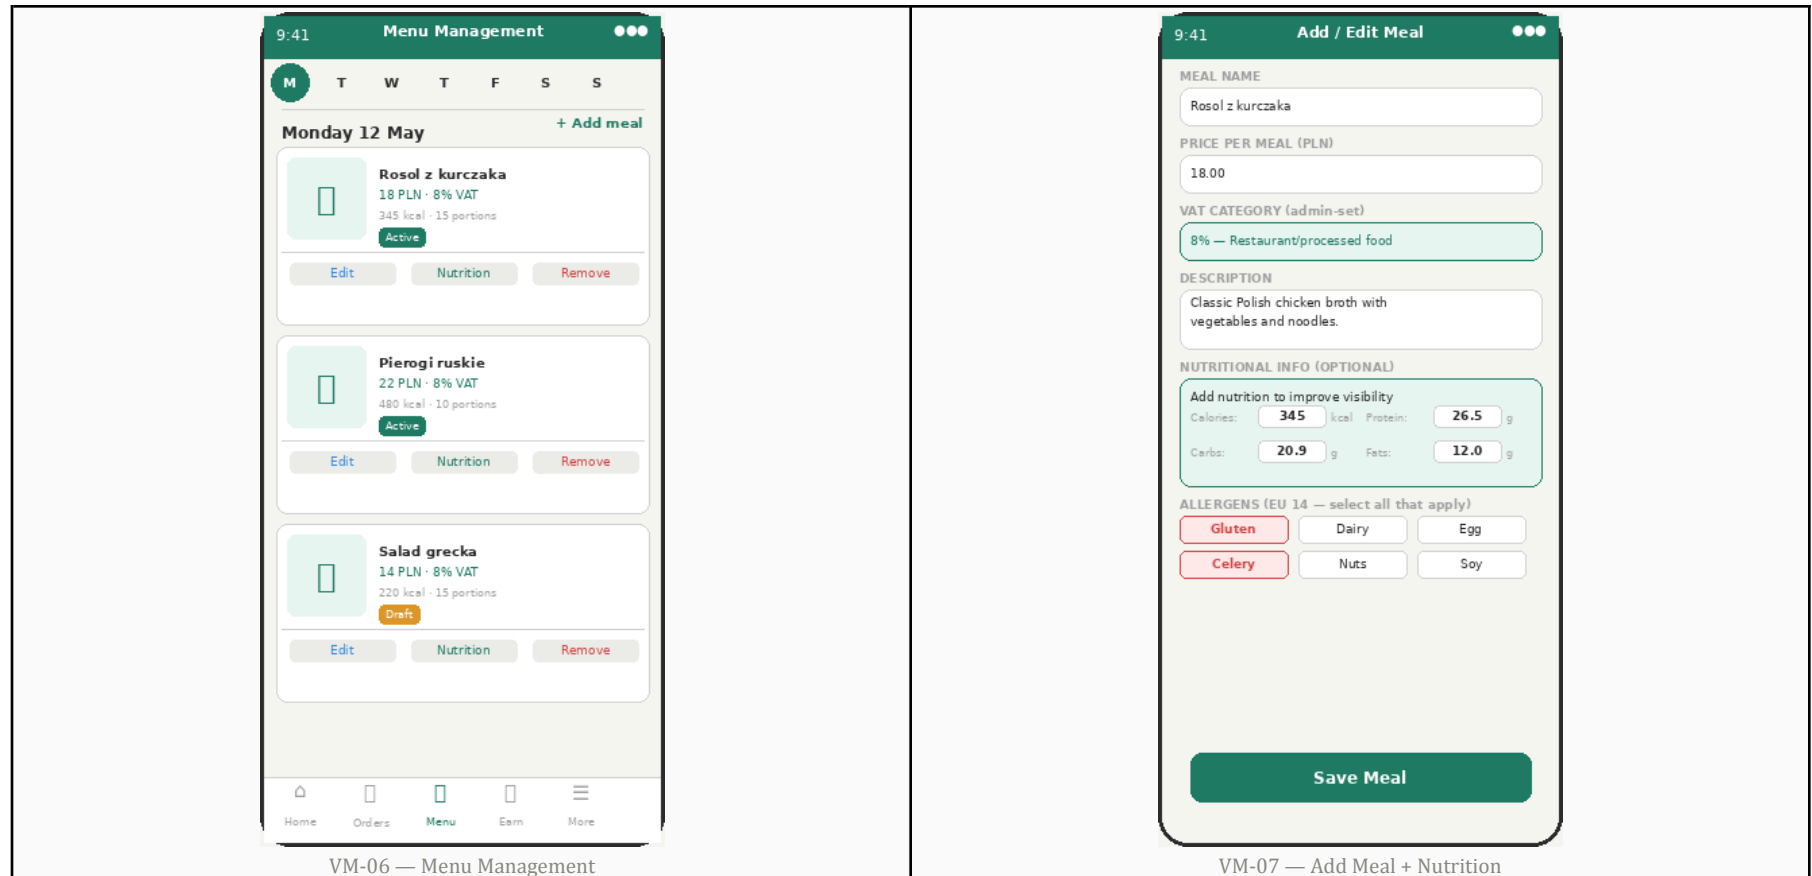

```
FCM.send(driver.device_token, {
  title: vendor.name + " is ready! 🟢",
  body: batch.order_count + " boxes ready. PIN: " + pin + ". Tap to navigate.",
  data: {
    screen: "pickup_detail",
    vendor_id, vendor_lat, vendor_lng, vendor_address,
    batch_id, collection_pin: pin, box_count: batch.order_count
  }
})
```

5. Vendor screen shows PIN per batch:

"Batch A PIN: 7842 – Show this to driver"

```
// Driver enters PIN in driver app → PATCH /api/collection/verify
// On correct PIN: orders → "collected", vendor notified via FCM:
FCM.send(vendor.device_token, {
  title: "Batch A collected ✓",
  body: "Jan W. collected 8 boxes at 11:52. PIN verified.",
  data: { screen: "delivery_assignment", event: "batch_collected" }
})
```

6. Menu Management

VM-06	Menu Management Screen	✓ INCLUDED	v1.0 + v2.0
-------	------------------------	------------	-------------

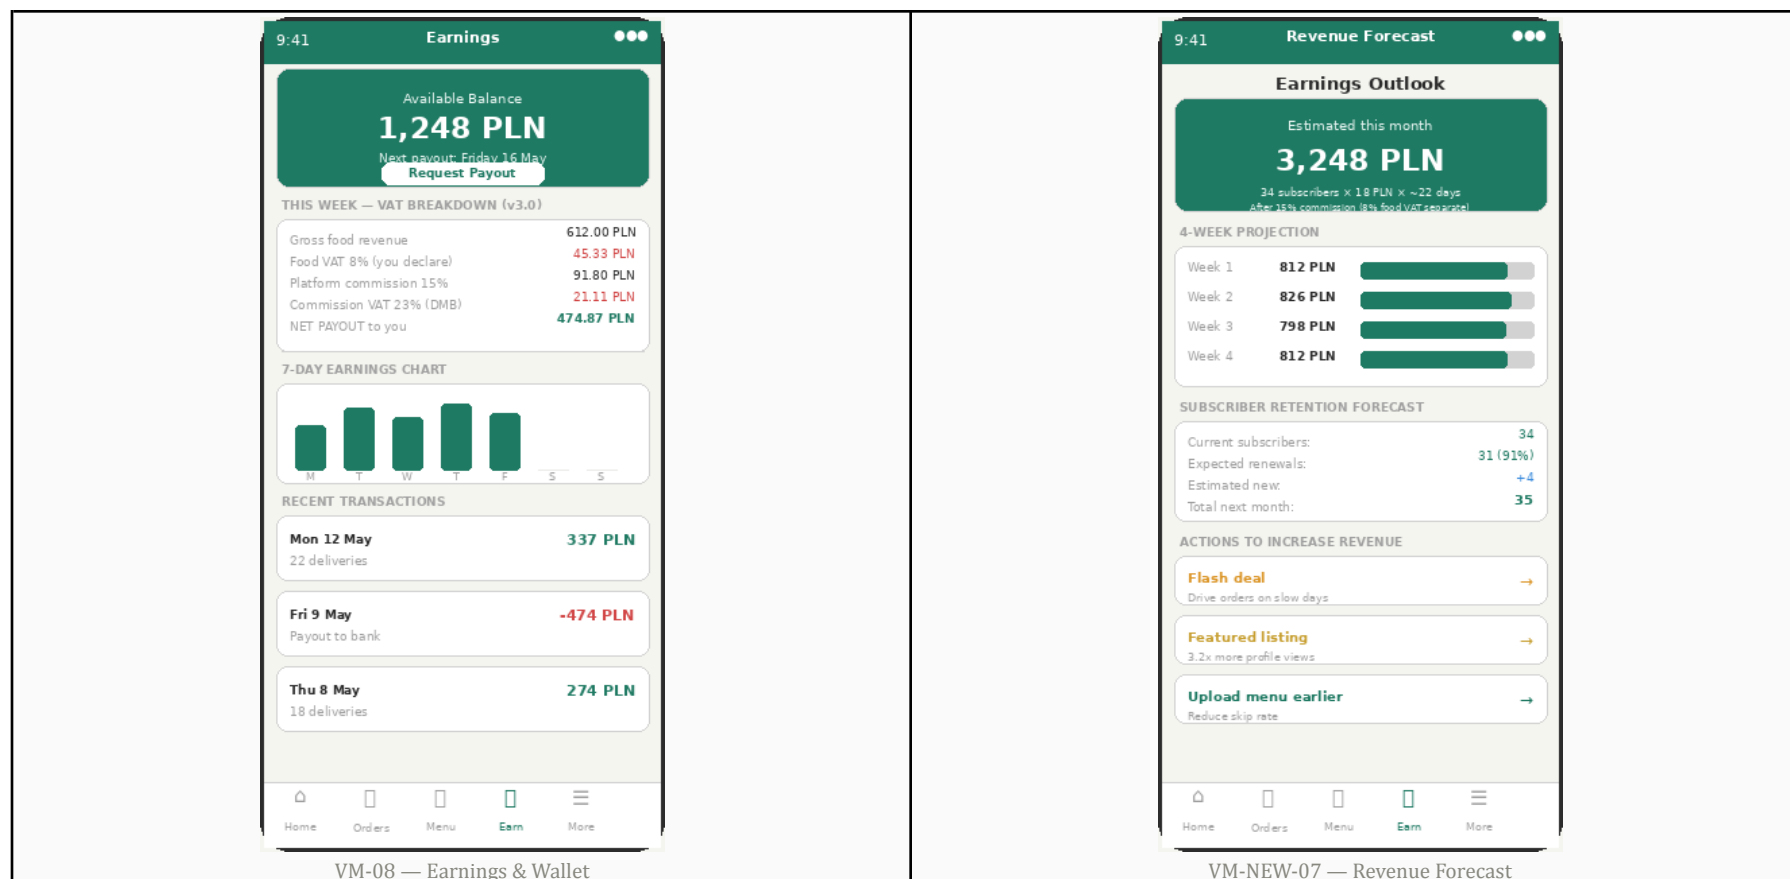

Feature	Status	Admin Control	Notes / Logic
Weekly Mon–Sun calendar view	💬 CONFIRMED	WhatsApp 11 Apr	Tap day to view/edit that day meals.

Meal cards: photo, price, nutrition summary, status badge	✓ INCLUDED	—	Active / Draft / Archived.
Flash deal badge on active deals	✓ INCLUDED	ACM-41	If admin has enabled flash deals in city.
Surprise box badge on active boxes	✓ INCLUDED	ACM-39	If admin has enabled surprise boxes.
Add/Edit/Remove meals	✓ INCLUDED	—	Routes to VM-07.
Draft mode (prepare before publishing)	✓ INCLUDED	—	Draft = not visible to customers.
Push: menu uploaded → triggers tomorrow forecast push to subscribers	✓ INCLUDED	ACM-30	When vendor uploads tomorrow menu, system sends "Tomorrow menu" push to customers at configured time.

VM-07	Add / Edit Meal + Nutrition	✓ INCLUDED	v1.0 + v3.0
--------------	------------------------------------	------------	-------------

Feature	Status	Admin Control	Notes / Logic
Meal name, description, price, portions (capacity cap)	✓ INCLUDED	ACM-58	Required. Admin sets max per vendor type.
Meal photo upload (min 1)	✓ INCLUDED	—	Firebase Storage or S3.
Calories (kcal) — optional	✓ INCLUDED	ACM-44	Admin sets which fields shown.
Protein (g) — optional	✓ INCLUDED	ACM-44	
Carbohydrates (g) — optional	✓ INCLUDED	ACM-44	
Fats (g) — optional	✓ INCLUDED	ACM-44	
EU allergen multi-select (14 standard + admin extras)	✓ INCLUDED	ACM-46 (law)	Cannot remove EU 14. Admin can add extras.
Diet tags (vegan, gluten-free, keto)	✓ INCLUDED	—	Used for customer filter.
VAT rate shown per meal (v3.0)	✓ INCLUDED	ACM-80	NEW v3.0. Shows: "This meal category: 8% VAT (restaurant/processed food)." Admin sets per vendor type.
Nutrition "not provided" fallback	✓ INCLUDED	—	Meal still orderable. Shows note on customer screen.

7. Earnings, Wallet & VAT Settlement (v3.0)

VM-08	Earnings & Wallet — with VAT Settlement	✓ INCLUDED	v1.0 + v3.0
-------	---	------------	-------------

v3.0 adds full VAT breakdown to vendor earnings screen. Vendor sees: gross food revenue, food VAT (8%) that passes through to tax authority, platform commission, commission VAT (23%), and their actual net payout. This transparency is required for vendor accounting and EU VAT compliance.

Feature	Status	Admin Control	Notes / Logic
Available wallet balance (prominent green)	✓ INCLUDED	—	After commission deductions.
Request payout button	✓ INCLUDED	ACM-52	Admin sets schedule. Vendor can request if admin allows.
Next payout date + estimated amount	✓ INCLUDED	ACM-52	Always shown. Default: every Friday 17:00.
VAT settlement breakdown (v3.0)	✓ INCLUDED	ACM-80	NEW. Shows per week: gross food revenue, food VAT 8% (vendor declares), platform commission, commission VAT 23% (DMB declares), net vendor payout.
This week earnings: gross / commission / net	✓ INCLUDED	ACM-51	Commission rate shown explicitly.
7-day earnings bar chart	✓ INCLUDED	—	Visual trend.
Transaction log with type (delivery/payout/refund/commission)	✓ INCLUDED	—	
Push: payout processed	✓ INCLUDED	ACM-52	FCM + Email. Cannot disable. Amount, bank, expected arrival date.
Push: commission rate changed	✓ INCLUDED	ACM-51	FCM + Email if admin changes commission rate.

Vendor Settlement Statement — VAT Breakdown (v3.0)

```
// Weekly settlement calculation for vendor:
async function calculateVendorSettlement(vendorId, weekStart, weekEnd) {
  const orders = await Order.find({
    vendor_id: vendorId,
    delivery_date: { $gte: weekStart, $lte: weekEnd },
    status: "delivered"
  })

  const vendor = await Vendor.findById(vendorId)
  const vatRate = await remoteConfig.get("food_vat_rate_" + vendor.city)
  // e.g. 0.08 for Warsaw (8% - corrected from 5%)

  let grossFoodRevenue = 0, commissionAmount = 0
  orders.forEach(order => {
    grossFoodRevenue += order.meal_price
    commissionAmount += order.meal_price * vendor.commission_rate
  })

  // VAT calculations:
  const foodNetRevenue = grossFoodRevenue / (1 + vatRate)
  const foodVatAmount = grossFoodRevenue - foodNetRevenue
  // Note: food VAT "belongs" to vendor - they declare it to tax authority
  // DailyMealBox passes the gross food amount to vendor

  const commissionNet = commissionAmount / 1.23 // 23% VAT on commission
  const commissionVat = commissionAmount - commissionNet
}
```

```

// Commission VAT belongs to DailyMealBox

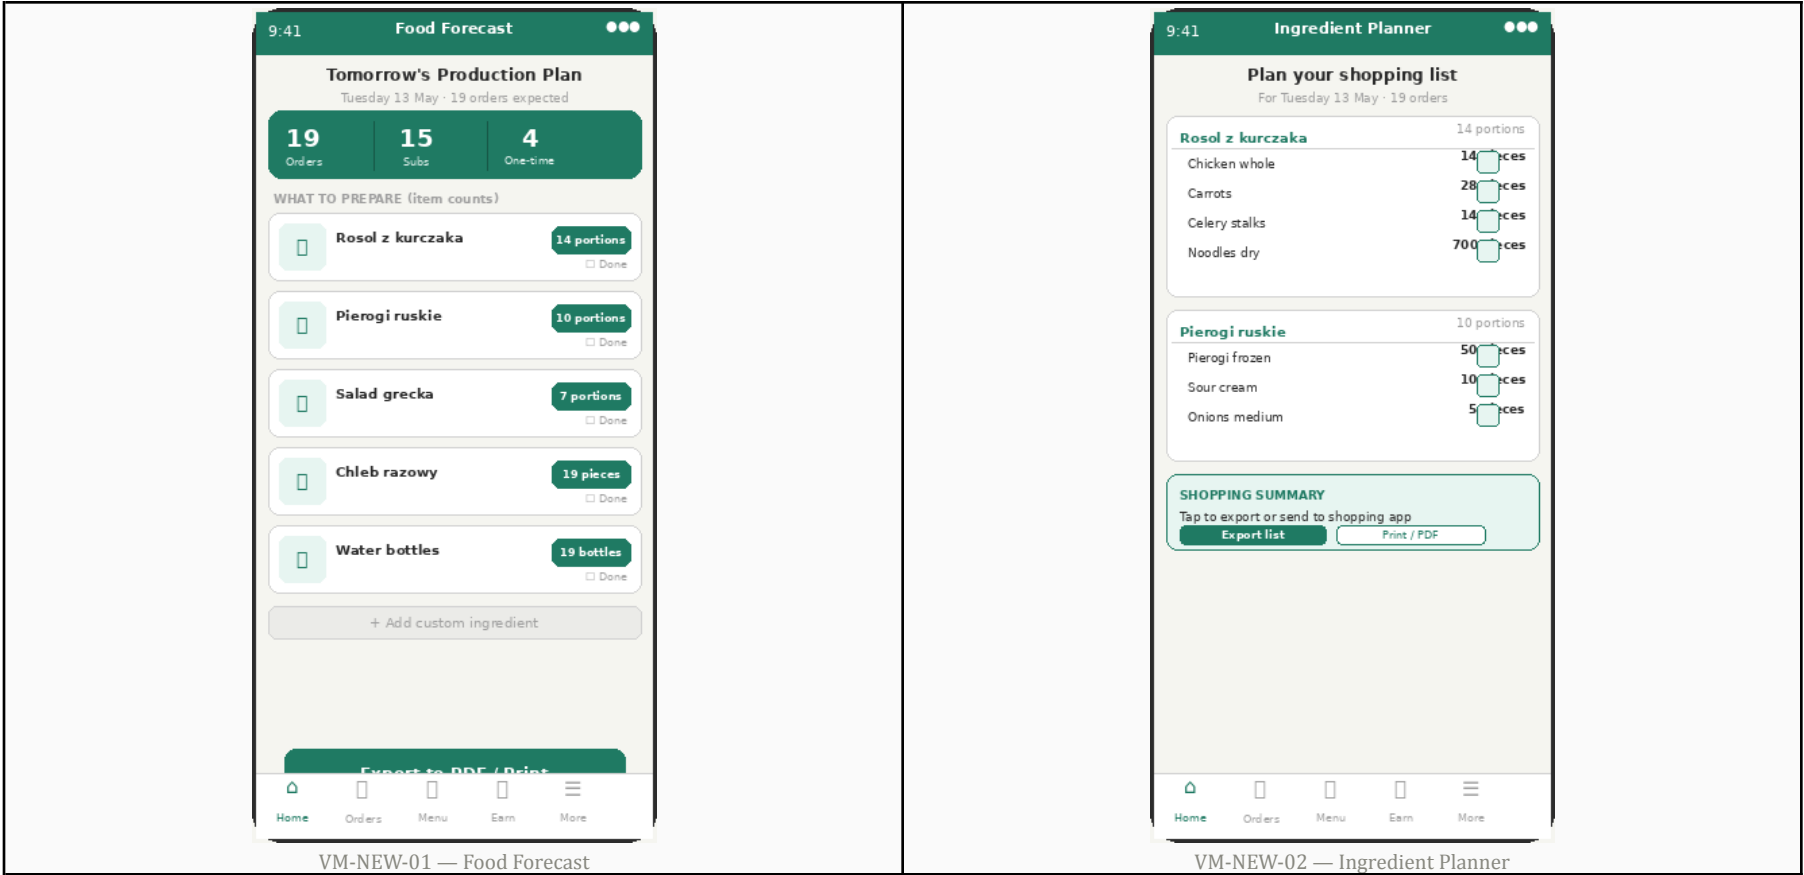

const vendorNetPayout = grossFoodRevenue - commissionAmount
// Vendor receives: gross food - commission (both inclusive of VAT)

// Settlement statement stored:
return {
  period: { start: weekStart, end: weekEnd },
  orders_count: orders.length,
  gross_food_revenue_pln: grossFoodRevenue,
  food_vat_rate: vatRate * 100 + "%",    // 8%
  food_vat_amount: foodVatAmount,       // vendor declares this
  food_vat_owner: "vendor",
  platform_commission_gross: commissionAmount,
  platform_commission_vat: commissionVat, // DailyMealBox declares this
  platform_commission_net: commissionNet,
  vendor_net_payout: vendorNetPayout,
  kitchen_partner_id: vendor.kitchen_partner_id || null,
  // If home cook: DailyMealBox pays Kitchen Partner, KP pays cook
}
}

// Home cook settlement (via Kitchen Partner):
if (vendor.kitchen_partner_id) {
  // DailyMealBox pays Kitchen Partner:
  const kpPayout = vendorNetPayout // full net goes to KP
  // Kitchen Partner pays home cook:
  const cookPayout = vendorNetPayout * kitchenPartner.settlement_split // e.g. 85%
  const kpFee = vendorNetPayout * kitchenPartner.management_fee_pct    // e.g. 15%
}

```

8. Smart Features (v2.0 + v3.0)

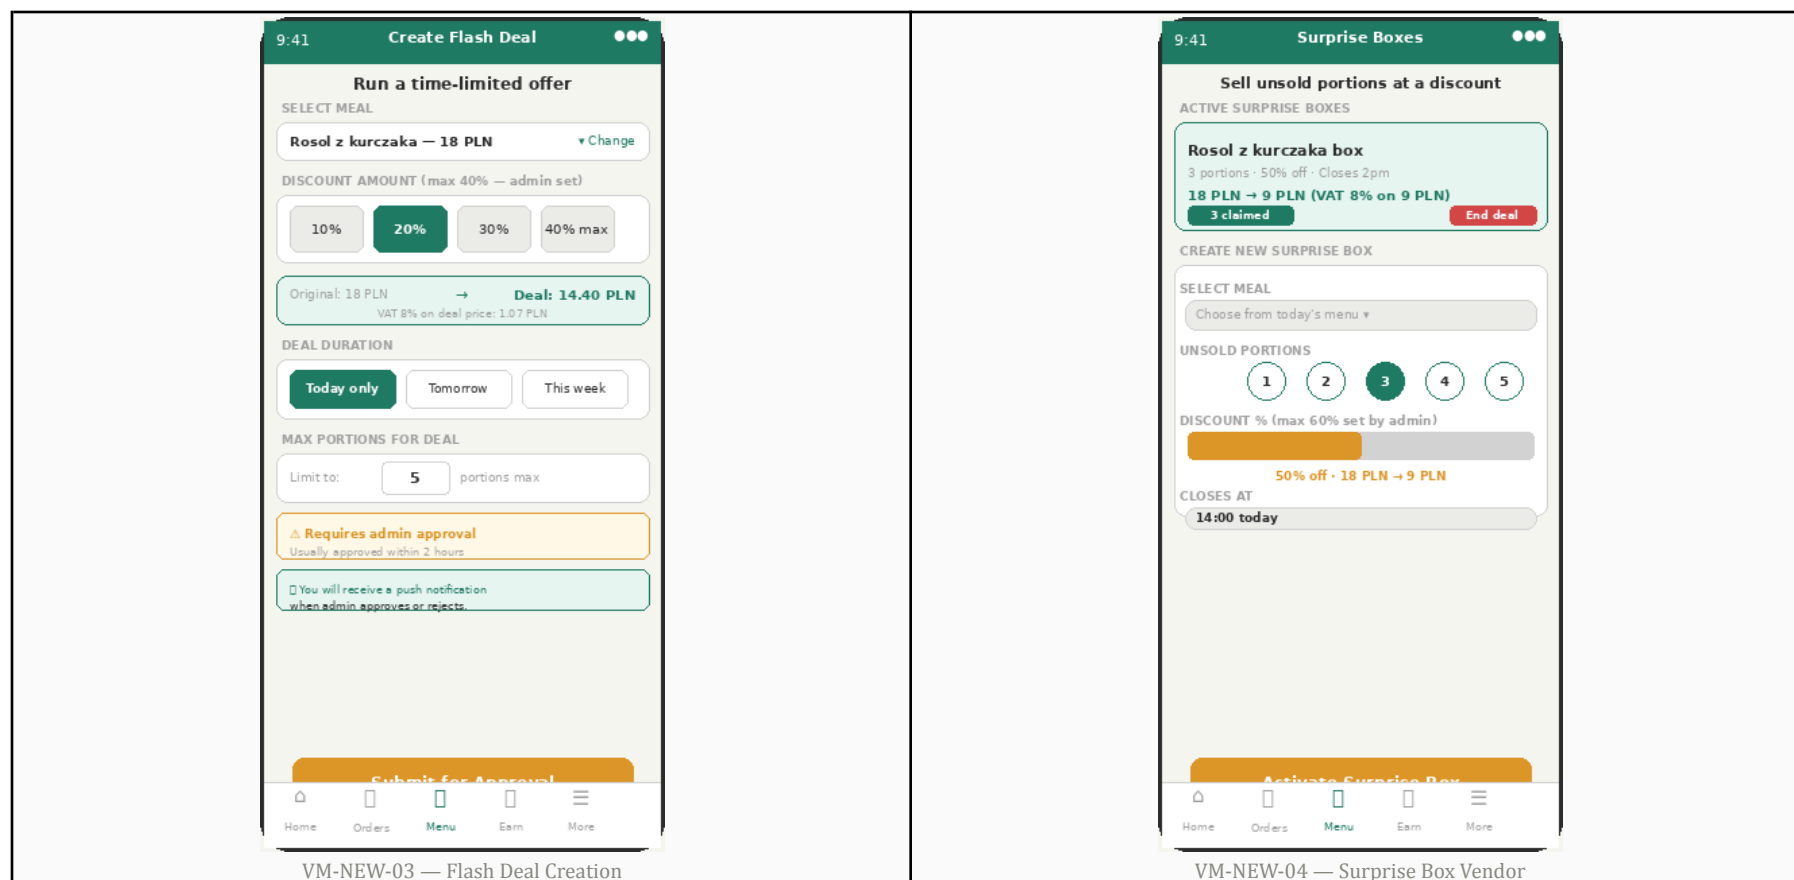

VM-NE W-01	Food Forecast Screen	✓ INCLUDED	v2.0
---------------	----------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Tomorrow expected order count (subscriptions + estimated one-time)	🗨 CONFIRMED	ACM-30/WhatsApp 11 Apr	Algorithm: confirmed subs + 4-week average one-time × 1.1 buffer.

Per-meal item counts (what to prepare)	✓ INCLUDED	—	Item count only (Phase 1 decision). kg/litre = Phase 2.
Checklist with mark-as-done per item	✓ INCLUDED	—	Visual progress.
Export to PDF / Print	✓ INCLUDED	—	Printable kitchen order sheet.
Push trigger: forecast ready at admin-set time	✓ INCLUDED	ACM-30	Home cook: 7pm. Restaurant: 8pm. Catering: 6pm. Configurable.

VM-NE W-02	Ingredient Planner	✓ INCLUDED	v2.0
---------------	--------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Per-meal ingredient breakdown (recipe × order count)	✓ INCLUDED	—	Vendor sets recipe once. System multiplies by expected count.
Item count units only (Phase 1)	✓ INCLUDED	—	e.g. "14 chicken pieces, 28 carrots." kg/litre in Phase 2.
Export shopping list (email / PDF / copy)	✓ INCLUDED	—	Useful for market visits.

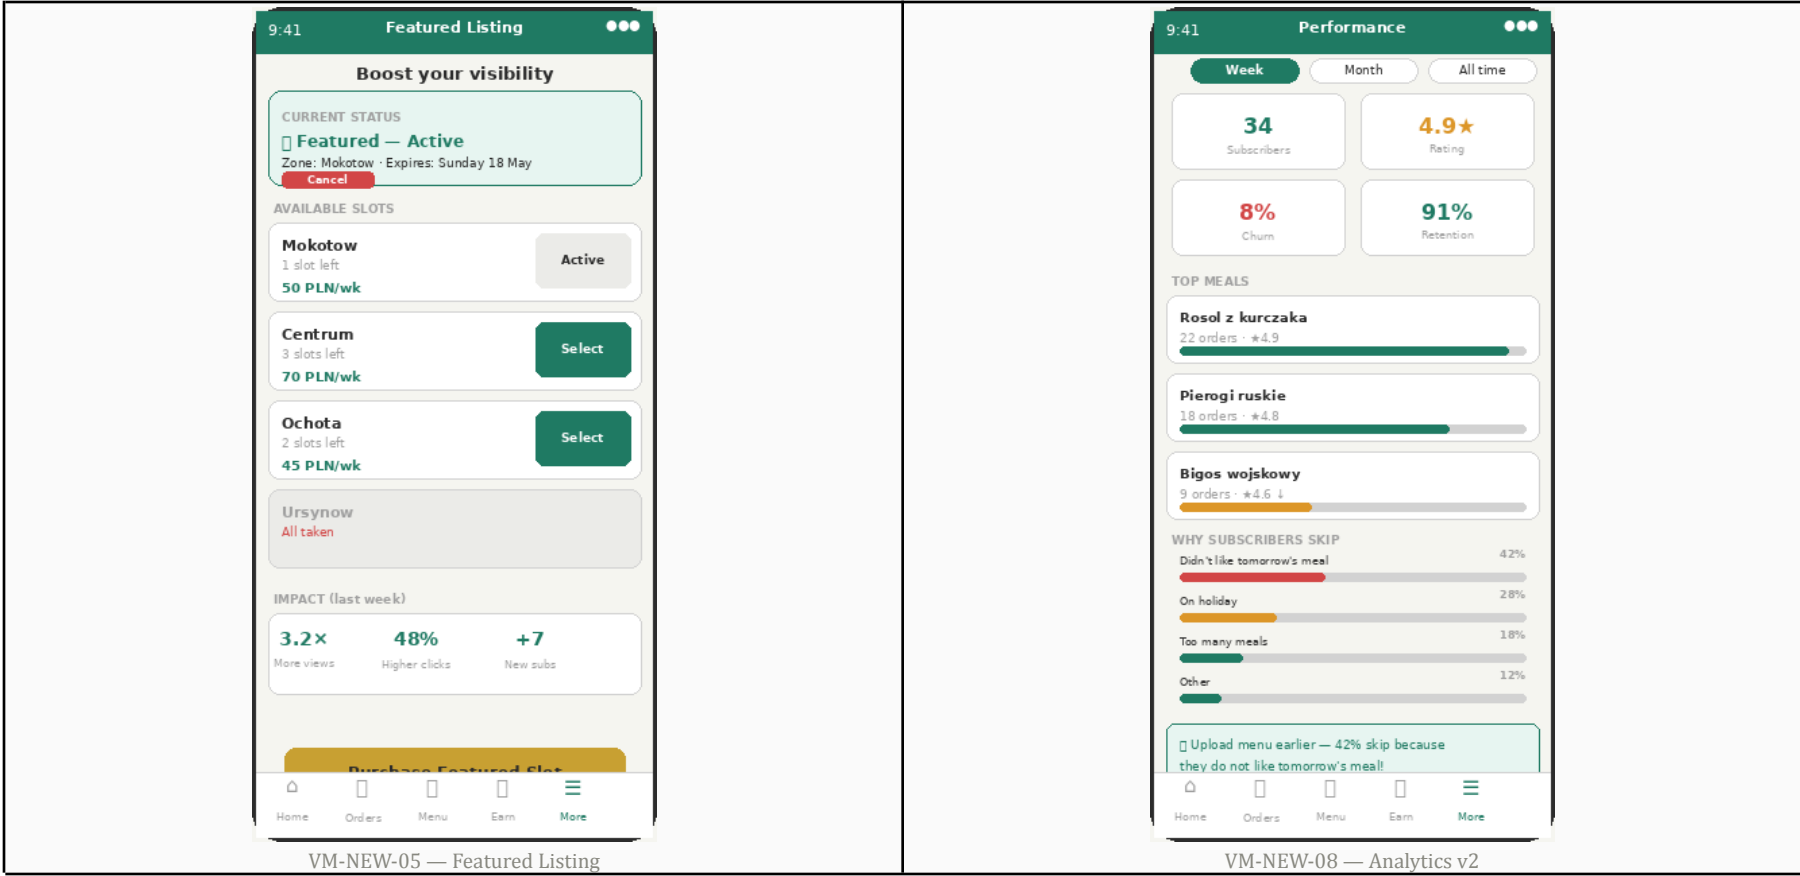

VM-NE W-03	Flash Deal Creation	✓ INCLUDED	v2.0 + v3.0
---------------	---------------------	------------	-------------

Feature	Status	Admin Control	Notes / Logic
Select meal, set discount %, duration, max portions	✓ INCLUDED	ACM-41/60	Max discount: admin-set (default 40%).
Price preview: original → deal price + VAT note (v3.0)	✓ INCLUDED	ACM-80	NEW v3.0. Shows: "Deal price 14.40 PLN (incl. 8% VAT on discounted price)." VAT calculated on actual charged amount.
Admin approval required before going live	✓ INCLUDED	ACM-41	Dash-board + email alert to admin. 2h auto-escalation.
Push: flash deal approved	✓ INCLUDED	ACM-41	FCM to vendor. Cannot disable. See notification catalogue.

Push: flash deal rejected with reason	✓ INCLUDED	ACM-41	FCM to vendor. Cannot disable.
---------------------------------------	------------	--------	--------------------------------

VM-NE W-04	Surprise Meal Box (Vendor Side)	✓ INCLUDED	v2.0
---------------	---------------------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
List unsold portions at discount (up to admin max 60%)	✓ INCLUDED	ACM-39/60	No admin approval needed — self-serve within limits.
Set portion count, discount %, close time	✓ INCLUDED	—	
End deal early button	✓ INCLUDED	—	Vendor can close early if sold out manually.
Admin can disable per city	⚙ ADMIN	ACM-39	If city not ready for surprise boxes.

VM-NEW-05 — Featured Listing

VM-NEW-08 — Analytics v2

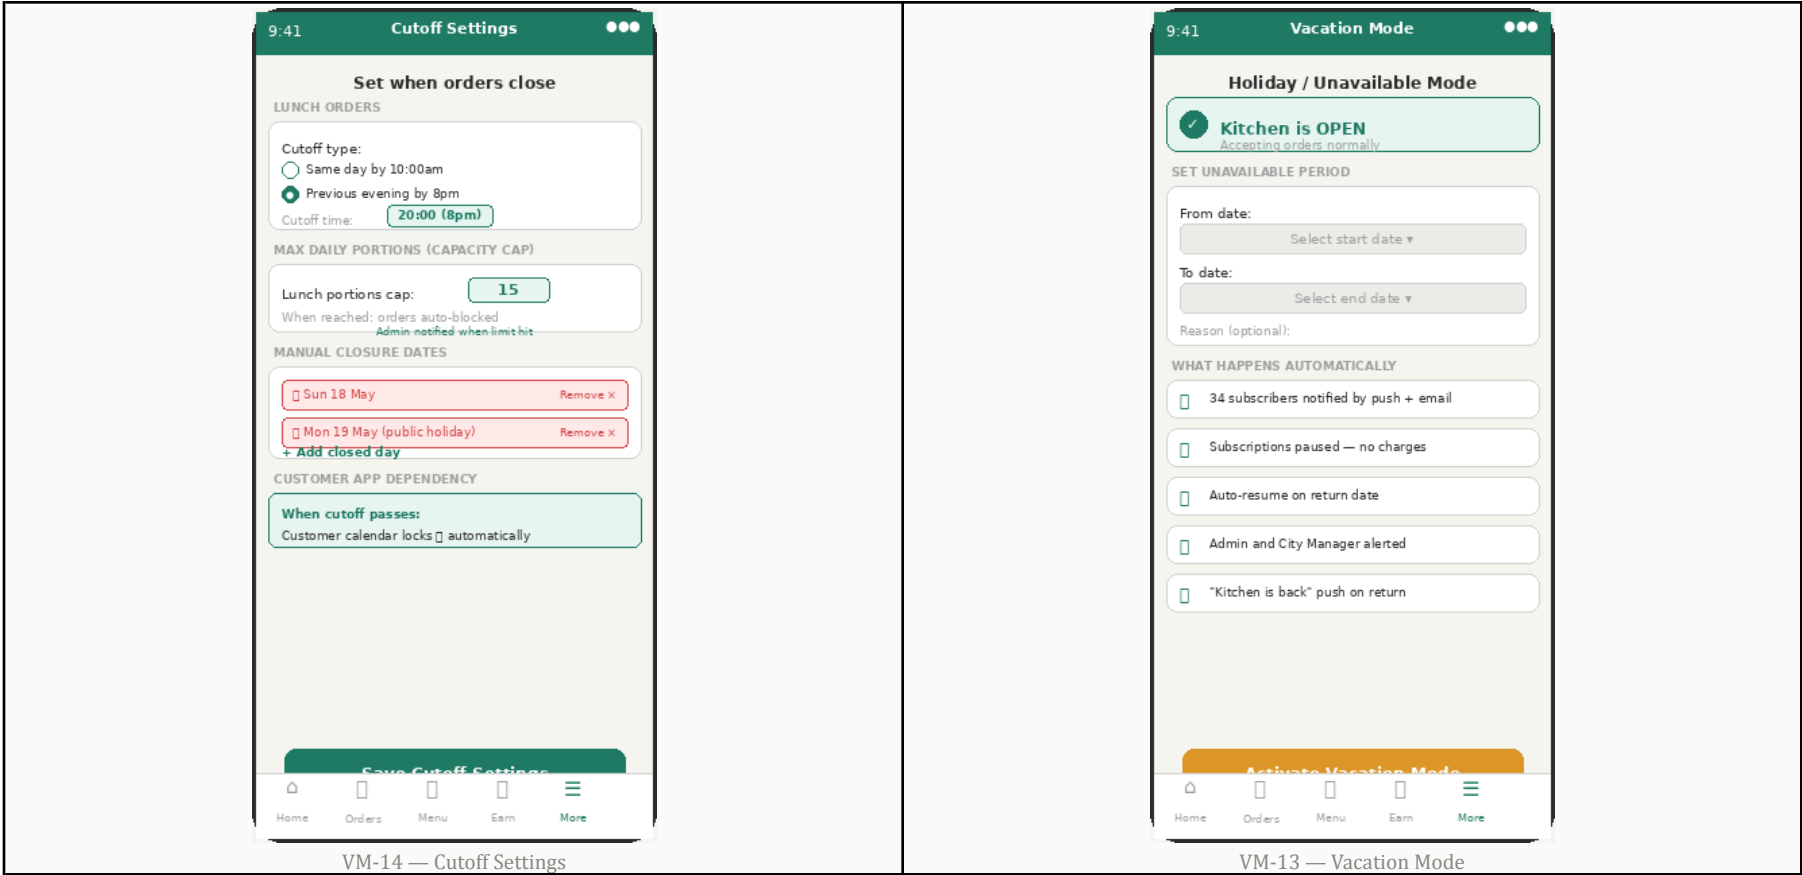

VM-NE W-05	Featured Listing Management	✓ INCLUDED	v2.0
---------------	-----------------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Current featured status with zone + expiry	✓ INCLUDED	ACM-42	
Available slots per zone with price per week	✓ INCLUDED	ACM-42/54	Admin sets price per zone.
Purchase featured slot (deducted from wallet)	✓ INCLUDED	ACM-42	
Featured listing impact stats (views, clicks, new subs)	✓ INCLUDED	—	Shows ROI from last active featured slot.

VM-NE W-08	Enhanced Analytics v2 (with Skip Reasons)	✓ INCLUDED	v2.0
---------------	---	------------	------

Feature	Status	Admin Control	Notes / Logic
Period selector: Week / Month / All time	✓ INCLUDED	—	
KPIs: Subscribers / Rating / Churn / Retention	✓ INCLUDED	ACM-62	Admin restricts which metrics vendors see.
Skip reason breakdown (v2.0)	✓ INCLUDED	ACM-62	Why subscribers skip. Actionable insight for vendor.
Actionable insight panel ("Upload menu earlier!")	✓ INCLUDED	—	Auto-generated text based on skip data.
Admin can restrict which metrics vendors see	⚙ ADMIN	ACM-62	Protects platform-sensitive data.

9. Cutoff, Vacation Mode & Delivery Assignment

VM-14	Order Cutoff & Capacity Settings	✓ INCLUDED	v1.0
-------	----------------------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Lunch cutoff type + time (prev evening or same day)	✓ INCLUDED	ACM-55	Home cook default: prev evening 20:00. Admin sets limits.

Dinner cutoff type + time	✓ INCLUDED	ACM-56	Restaurant default: same day 15:00.
Max daily portions capacity cap	✓ INCLUDED	ACM-58	Admin sets max per vendor type. System auto-closes when reached.
Manual closure dates (holidays)	✓ INCLUDED	—	Specific day closures. Different from vacation mode.
Customer app cutoff lock dependency	✓ INCLUDED	ACM-55/56/57	VM-14 feeds CA-12 calendar lock. When cutoff passes: customer cannot order.
Admin alert when capacity reached	⚙ ADMIN	ACM-58	Signal to add more vendors in that zone.

VM-13	Vacation / Holiday Mode	✓ INCLUDED	v1.0 — MISSING from Appzeto scope
--------------	--------------------------------	------------	-----------------------------------

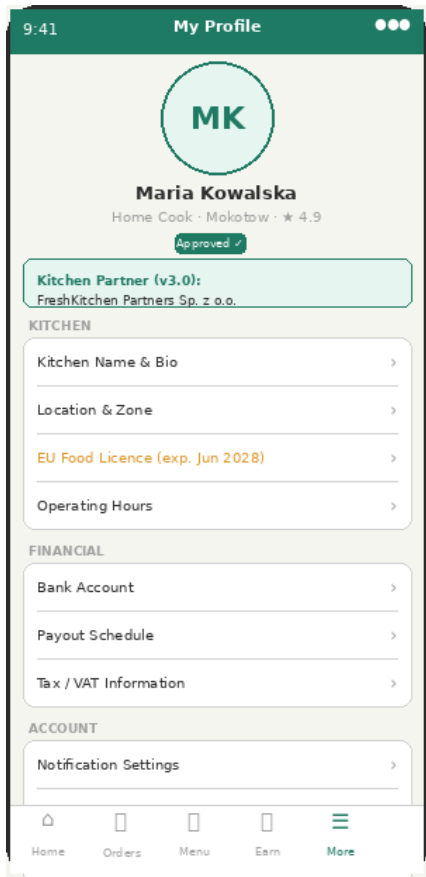

MISSING: MISSING FROM APPZETO SCOPE — MUST ADD. Full automation: subscribers auto-pause, no charges, auto-resume on return, subscriber notifications, admin alert.

Feature	Status	Admin Control	Notes / Logic
Date range picker (from → to)	✓ INCLUDED	—	Must add.
Auto-pause all affected subscriptions (no charges)	✓ INCLUDED	—	Must add.
Subscriber push + email notification on vacation activate	✓ INCLUDED	—	Push + email to all 34 affected subscribers.
Admin/City Manager alert	✓ INCLUDED	ACM-63	Admin knows to find backup vendor coverage in zone.
Auto-resume on return date (CRON)	✓ INCLUDED	—	Must add. Push to subscribers: "Kitchen is back!"
Push: vacation activated to subscribers	✓ INCLUDED	—	FCM + Email to all affected subscribers.
Push: kitchen returns from vacation	✓ INCLUDED	—	FCM push to all subscribers day of return.

VM-10	Delivery Assignment	✓ INCLUDED	v1.0
--------------	----------------------------	------------	------

Feature	Status	Admin Control	Notes / Logic
Assigned driver card (name, vehicle, ETA)	✓ INCLUDED	—	Visible from 10:30am after daily route generation.
Batch breakdown (time, box count, zones)	✓ INCLUDED	—	Vendor knows exactly what to prepare per batch.
Collection PIN display per batch	✓ INCLUDED	—	MISSING: 4-digit PIN shown when vendor marks Ready. Must add.
Confirm all ready button → generates PINs + driver FCM	✓ INCLUDED	—	Must include FCM push to driver.
Driver quick messages received (toast)	✓ INCLUDED	ACM-53	Vendor sees: "On my way (5 min)" from driver.

10. Profile & Kitchen Partner Model

VM-12 — Vendor Profile

VM-12	Vendor Profile & Settings	✓ INCLUDED	v1.0 + v3.0
-------	---------------------------	------------	-------------

Feature	Status	Admin Control	Notes / Logic
Kitchen name, bio, zone, hours	✓ INCLUDED	—	Public-facing listing details.
EU food licence view/update (with expiry)	✓ INCLUDED	ACM-49	30-day warning push. Auto-suspend on expiry.

Vacation mode shortcut → VM-13	✓ INCLUDED	—	
Bank account + payout schedule (if admin allows change)	✓ INCLUDED	ACM-52	
VAT/tax number (restaurant/cloud kitchen)	☞ CONFIRMED	WhatsApp 11 Apr	NIP for vendor VAT registration.
Kitchen Partner details (Home Cook only) — v3.0	✓ INCLUDED	—	Shows linked Kitchen Partner name. Cannot change without admin approval. Kitchen Partner handles all VAT/invoicing.
Notification preferences	✓ INCLUDED	—	Toggle per notification type.
Deactivate account (red, requires confirmation)	✓ INCLUDED	—	Admin notified on deactivation.

10.1 Kitchen Partner Model for Home Cooks

Home cooks without a registered company must link to a Kitchen Partner before going live. The Kitchen Partner is a registered Sp. z o.o. that holds the EU food safety certification, issues food invoices on behalf of the home cook, receives payment from DailyMealBox, and pays the home cook their share (typically 85%).

Aspect	Restaurant (own company)	Home Cook (via Kitchen Partner)
Invoice issuer	Vendor issues own food invoice (or DMB self-invoices)	Kitchen Partner issues food invoice to DailyMealBox
VAT registration	Vendor has own NIP. Declares food VAT themselves.	Kitchen Partner has NIP. Declares food VAT for all linked cooks.
Payment flow	DMB pays vendor net (food minus commission)	DMB pays Kitchen Partner. KP pays cook 85% of net.
EU food safety	Restaurant has own Sanepid cert	Kitchen Partner holds Sanepid for the certified kitchen space
Customer sees	Vendor name on listing. DMB on invoice.	Home cook name on listing. DMB on customer invoice.
