

DailyMealBox

PRODUCT REQUIREMENTS DOCUMENT

Part 1 — Customer App · FINAL

Document	FINAL merged version — supersedes all previous versions
Version	v3.0 Final
Date	19 May 2026
Platforms	Android · iOS · Web (responsive)
Tech Stack	React Native · React.js · Node.js · MongoDB · Redis · Socket.io
Brand	#1F7A63 Deep Green · #F5F5F0 Soft Beige · #2B2B2B Dark Gray
Developer	Appzeto — Indore, India
Markets	Warsaw (PLN) → Berlin (EUR) → Paris (EUR)

1. App Overview — Platforms & Navigation

DailyMealBox Customer App is subscription-first. It is a control panel for recurring meals — not a marketplace. 3-tap maximum for any critical action. Admin-disabled features are completely hidden (not greyed out). All feature flags delivered via Firebase Remote Config (OTA) — no reinstall needed.

Navigation — 5 Tab Bar

🏠 Home	☰ Plans	📅 Calendar	🕒 Orders	👤 Profile
Dashboard, next delivery, quick actions, loyalty widget, OTA banner	Browse + filter plans, surprise boxes, flash deals, featured vendors	Weekly view, skip/reschedule/swap, cutoff lock, tomorrow preview	Upcoming + past, live tracking, refund status, receipts/invoices	Settings, diet, proof preference, loyalty, B2B, invoice prefs, GDPR

2. VAT & Tax Engine — Complete Implementation

The VAT engine is the core financial infrastructure. Every order, every invoice, every settlement flows through it. Customer sees ONE total price. Internally the system splits VAT ownership: food VAT belongs to vendor, delivery VAT belongs to fleet partner, commission VAT belongs to DailyMealBox.

2.1 VAT Rate Matrix — All Countries

Line Item	Poland	Germany	France	VAT Owner / Notes
Meal subscription (restaurant/processed)	8% $\triangle$ CORRECTED	7%	10%	VENDOR. Home cooks use Kitchen Partner VAT. Admin configures per vendor type.
Basic food items (raw/unprocessed)	5%	7%	5.5%	VENDOR. Only if vendor food qualifies. Admin sets per vendor type via Remote Config.
Delivery service fee	23%	19%	20%	FLEET PARTNER. Fleet partner invoices DailyMealBox. DMB passes cost to customer.
Platform commission (from vendor)	23%	19%	20%	DailyMealBox. Shown on vendor settlement, not customer receipt.
Driver tips	23%	19%	20%	FLEET PARTNER. 100% goes to driver. Fleet partner declares tip VAT.
EU cross-border B2B invoice	0% reverse charge	0% reverse charge	0% reverse charge	Buyer self-accounts. Invoice must state: "Art. 196 EU VAT Directive."
Discounted price (surprise box/coupon)	VAT on actual price	VAT on actual price	VAT on actual price	50% off = VAT calculated on discounted price, not original.

2.2 VAT Ownership Split

VAT Engine — Core Calculation (Node.js)

```
// VAT rates from Remote Config (admin sets per city — OTA, no reinstall):
const VAT_RATES = {
  warsaw: { food_restaurant:0.08, food_basic:0.05, delivery:0.23, service:0.23, tips:0.23 },
  berlin: { food_restaurant:0.07, food_basic:0.07, delivery:0.19, service:0.19, tips:0.19 },
  paris: { food_restaurant:0.10, food_basic:0.055, delivery:0.20, service:0.20, tips:0.20 }
}

function calculateOrderVAT(order, city, customerType, customerVatNumber) {
  const rates = VAT_RATES[city]

  // EU reverse charge: B2B buyer from different EU country:
  const isReverseCharge = (customerType==="b2b" && customerVatNumber &&
    getEuCountry(customerVatNumber) !== getEuCountry(city))
```

```

const foodRate = isReverseCharge ? 0 :
  (order.vendor.food_category=="basic" ? rates.food_basic : rates.food_restaurant)
const deliveryRate = isReverseCharge ? 0 : rates.delivery

const foodNet = order.meal_price / (1 + foodRate)
const foodVat = order.meal_price - foodNet
const deliveryNet = order.delivery_fee / (1 + deliveryRate)
const deliveryVat = order.delivery_fee - deliveryNet

return {
  // Customer sees:
  total_gross: order.meal_price + order.delivery_fee + (order.tip || 0),

  // Invoice breakdown:
  food_net: foodNet.toFixed(2), food_vat_rate: foodRate*100+"%",
  food_vat_amount: foodVat.toFixed(2), food_vat_owner: "vendor",

  delivery_net: deliveryNet.toFixed(2), delivery_vat_rate: deliveryRate*100+"%",
  delivery_vat_amount: deliveryVat.toFixed(2), delivery_vat_owner: "fleet_partner",

  is_reverse_charge: isReverseCharge,
  reverse_charge_notice: isReverseCharge ?
    "Reverse charge – Art. 196 EU VAT Directive" : null,

  // Internal settlement:
  vendor_receives_net: foodNet,
  fleet_receives_net: deliveryNet,
  platform_commission: foodNet * order.vendor.commission_rate,
}
}

```

2.3 Document Types — Receipt vs Invoice

Document	Who Gets It	Contents	Legal Basis
B2C Simple Receipt	Individual customers (default)	Gross price per item, VAT rate noted, no full breakdown required	EU VAT Art.238 — simplified invoice permitted B2C under EUR 100
B2B Full VAT Invoice	Company/office accounts	All fields: both NIPs, sequential number, net+VAT rate+VAT amount+gross per line, payment terms	EU VAT Art.226 — mandatory for B2B. Store 7 years.
Monthly Consolidated	B2B office managers	All orders combined for billing period. One invoice per company per month.	Required by B2B contract. Auto-generated 1st of each month.

Reverse Charge Invoice	EU cross-border B2B	Net amounts at 0%. "Reverse charge — Art.196 EU VAT Directive" statement.	EU VAT Art.196 — buyer self-accounts for VAT.
Credit Note	Refunded customers	References original invoice. Negative amounts. VAT correction.	Required by EU law when VAT invoice is refunded.

3. Home Cook Legal Model — Kitchen Partner Entity

Home cooks in Poland often lack a registered company or VAT number. Without a legal entity they cannot issue food invoices or receive commercial bank payments. Solution: Home Cook links to a Kitchen Partner company — a registered Sp. z o.o. that handles all legal, invoicing, and financial aspects on their behalf. This mirrors the model used by catering platforms across Poland.

KitchenPartner MongoDB Schema (New Collection)

```
// New collection: kitchen_partners
{
  _id, company_name: "FreshKitchen Partners Sp. z o.o.",
  nip: "521-111-111-11", krs: "0000123456",
  bank_iban: "PL61...", status: "active"|"suspended",
  city, zones: ["zone_mokotow", "zone_ochota"],

  home_cooks: [{
    cook_id, cook_name, cook_phone,
    contract_signed_at, contract_url, // Google Drive link
    settlement_split: 0.85,           // cook gets 85% of food revenue
    status: "active"
  }],

  management_fee_pct: 0.15, // Kitchen Partner keeps 15%
  food_licence_url,         // Sanepid certification — Google Drive
  food_licence_expiry,
  insurance_url,
  approved_by_admin_id, created_at
}

// Vendor document — home cook gets new field:
{ _id, vendor_type: "home_cook",
  kitchen_partner_id: ObjectId("..."), // NULL for restaurants/cloud kitchens
  // When set: all invoicing via Kitchen Partner
  // When null: vendor has own company
}

// Settlement flow for home cook order:
// DailyMealBox pays Kitchen Partner gross food amount (minus DMB commission)
// Kitchen Partner pays home cook: gross × settlement_split (e.g. 85%)
// Kitchen Partner keeps: gross × management_fee_pct (e.g. 15%)
// Kitchen Partner handles: VAT declaration, ZUS, income tax for cook
```

4. Onboarding Flow

CA-01	Welcome Screen	✓ INCLUDED	v2.0
-------	----------------	------------	------

Feature	Status	Admin Control	Notes
Brand splash with tagline "Your weekly food, automated"	✓ INCLUDED	—	Green top, beige bottom. City auto-detected badge shown.

City auto-detected badge	✓ INCLUDED	ACM-88	GPS detects city on first open. Shows "Warsaw, Poland detected."
Get Started + Log in CTAs	✓ INCLUDED	—	Routes to CA-03 Goal Selection or login.

CA-02	GPS Location Detection	✓ INCLUDED	v2.0
--------------	-------------------------------	------------	------

Feature	Status	Admin Control	Notes
Location permission request	✓ INCLUDED	ACM-88	iOS/Android/Web browser geolocation API.
Auto-detect city and zone via GeoJSON polygon match	✓ INCLUDED	ACM-88	Coords → reverse geocode → match zone polygon → "Mokotow, Warsaw detected."
Manual city override fallback	✓ INCLUDED	ACM-88	If GPS denied: city picker from admin-configured active cities.
Admin can disable GPS auto-detect	⚙ ADMIN	ACM-88	Falls back to city picker.

CA-03	Goal Selection	✓ INCLUDED	v2.0
--------------	-----------------------	------------	------

Feature	Status	Admin Control	Notes
4 goal cards: Eat Healthy / Save Time / Family Meals / Fitness	✓ INCLUDED	—	Stored as user.onboardingGoal. Affects plan recommendations throughout app.

CA-04	Dietary Preferences	✓ INCLUDED	v2.0
--------------	----------------------------	------------	------

Feature	Status	Admin Control	Notes
Diet type: No preference / Vegan / Vegetarian / Keto	✓ INCLUDED	—	Single select. Filters plan listings.
Allergy multi-select (EU 14 allergens + admin extras)	✓ INCLUDED	ACM-46 (law)	EU Reg 1169/2011 — always present. Admin can add extras.
Budget range slider	✓ INCLUDED	—	Sets price filter default on Plans screen.

CA-05	Delivery Schedule	✓ INCLUDED	v2.0
--------------	--------------------------	------------	------

Feature	Status	Admin Control	Notes
Days: Mon–Fri / Full week	✓ INCLUDED	—	Default Mon–Fri.

Delivery slot: Breakfast / Lunch / Dinner	✓ INCLUDED	ACM-10/11/12	Admin enables/disables slots per city.
Cutoff time explanation per slot	✓ INCLUDED	ACM-55/56/57	Admin configures cutoff per maker type.

CA-07	Subscription Checkout	✓ INCLUDED	v2.0 + v3.0
-------	-----------------------	------------	-------------

9:41 Checkout

Order summary

PRICE BREAKDOWN (VAT included)

Item	Net	Rate	Gross
Meal subs (5 meals)	75.93	8%	82.00
Delivery (5 del.)	5.69	23%	7.00

Subtotal (net): 81.62 PLN
Total VAT: 7.38 PLN
TOTAL / WEEK: 89.00 PLN

Food VAT 8% → Vendor
Delivery VAT 23% → Fleet Partner

CA-11	Meal / Plan Detail with Nutrition	✓ INCLUDED	v2.0
--------------	--	------------	------

Feature	Status	Admin Control	Notes
Photo gallery, nutrition panel (cal/protein/carbs/fats)	✓ INCLUDED	ACM-44	Optional vendor data. "Not provided" fallback.
EU allergen tags (red badges — always shown)	⚖ EU LAW	ACM-46	Cannot be disabled. EU Reg 1169/2011.
Kitchen Partner notice on home cook listings	✓ INCLUDED	—	NEW v3.0. "Certified Kitchen Partner" badge. FreshKitchen Partners Sp. z o.o.
"Matches your diet goal" green badge	✓ INCLUDED	ACM-45	If meal meets user calorie/macro targets.

7. Calendar Tab (CA-12) — Most Critical Screen

CA-12 — Calendar Screen

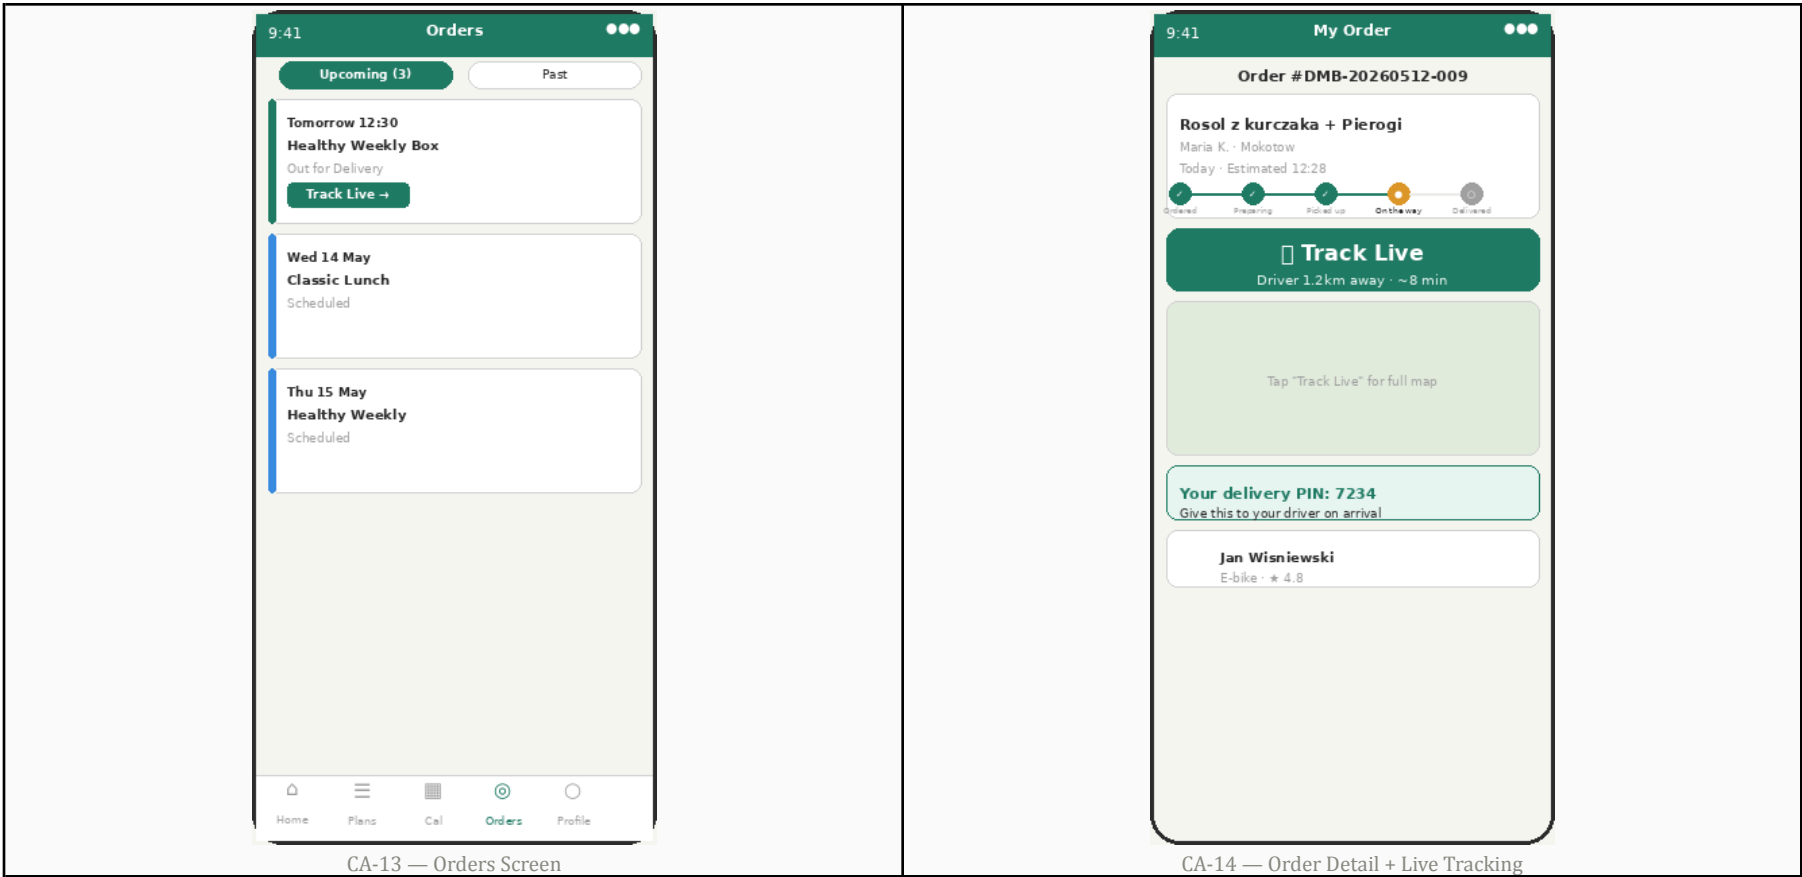

The subscriber control centre. Skip, pause, swap, reschedule — all from here. Admin-set cutoff locks days automatically. 3-tap maximum for any action.

Feature	Status	Admin Control	Notes
Weekly Mon–Sun grid. Current day highlighted.	✓ INCLUDED	—	Tap day to expand and take action.
Cutoff lock — days past cutoff show locked icon	✓ INCLUDED	ACM-55/56/57	All action buttons disabled after cutoff. Next available slot shown.
Skip delivery (with limit enforcement)	✓ INCLUDED	ACM-13	Default 2/month. If at limit: "2/2 skips used this month." Credit to wallet.
Pause subscription (with duration limit)	✓ INCLUDED	ACM-14	Default max 2 days. Auto-resume.
Swap meal (same vendor, different dish)	✓ INCLUDED	—	Before cutoff only. Shows available meals from same vendor.
Tomorrow meal preview on day card	✓ INCLUDED	ACM-30	Vendor must upload menu in advance.

Calendar Cutoff Lock Logic

```
function getDayState(order, vendorSettings) {
  const now = new Date()
  const cutoff = calculateCutoff(order.delivery_date, vendorSettings)
  if (now > cutoff) return { state:"locked", icon:"🔒", actions:[] }
  const skipsThisMonth = getSkipsThisMonth(user.id)
  const maxSkips = remoteConfig.getNumber("max_skips_per_month") || 2
  return {
    state: "scheduled",
    actions: [
      skipsThisMonth < maxSkips ? "skip" : "skip_disabled",
      "reschedule", "swap_meal"
    ]
  }
}
// On skip: credit wallet, notify vendor to adjust production
```

8. Orders Tab + Live Tracking

CA-13	Orders Screen	✓ INCLUDED	v2.0
-------	---------------	------------	------

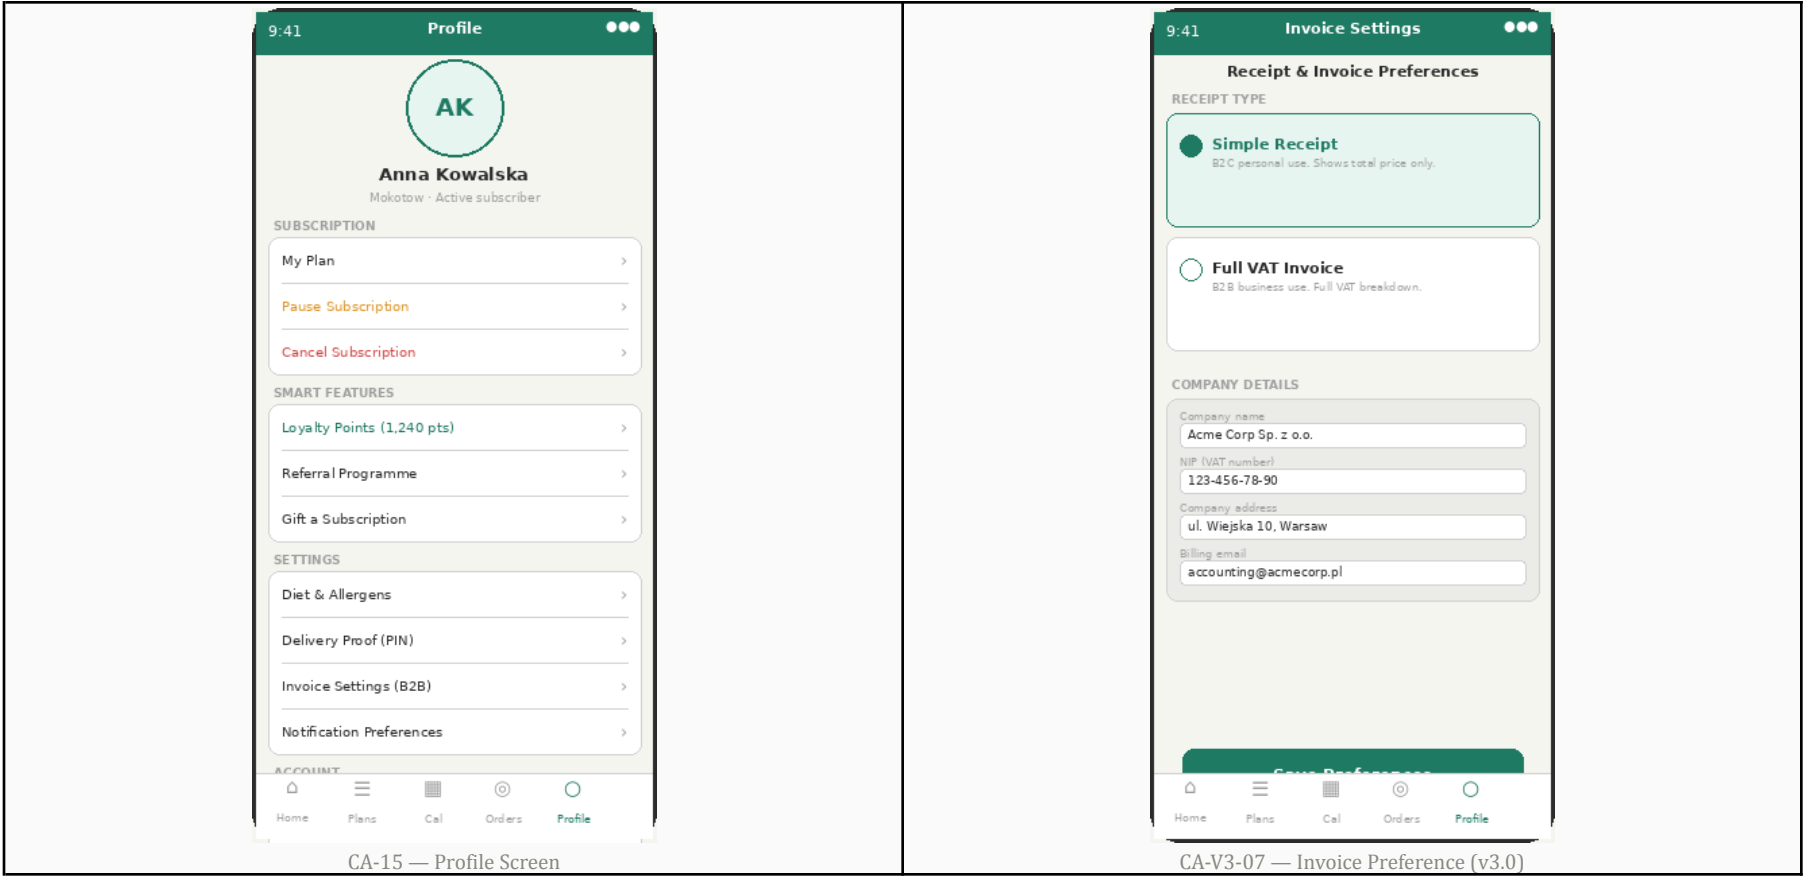

Feature	Status	Admin Control	Notes
Upcoming + past tabs	✓ INCLUDED	—	Timeline. Upcoming: next 7 deliveries. Past: all history.
Track Live button (when Out for Delivery)	✓ INCLUDED	ACM-23	Routes to CA-14. Admin can disable per city.

Notification tap → order detail → auto-opens tracking	✓ INCLUDED	—	Push notification deep-link. Both subscription and on-demand.
Refund status on past orders	✓ INCLUDED	—	Shows "Refund PLN 18 — Processing" or "Completed."
Download receipt / invoice from order	✓ INCLUDED	ACM-80	NEW v3.0. Download B2C receipt or B2B VAT invoice per order.

CA-14	Order Detail + Live GPS Tracking	✓ INCLUDED	v2.0
-------	----------------------------------	------------	------

Feature	Status	Admin Control	Notes
TRACK LIVE button (large, prominent green)	✓ INCLUDED	ACM-23	Must add. Opens full GPS map.
Driver moving dot on Google Maps (Socket.io, every 5s)	✓ INCLUDED	ACM-23/78	Must add. WebSocket GPS stream.
ETA badge (updates every 30s via Distance Matrix API)	✓ INCLUDED	ACM-24	Must add.
"Arriving Soon" auto-notification (500m trigger)	✓ INCLUDED	ACM-24	Must add. FCM push with PIN.
Delivery PIN displayed prominently	✓ INCLUDED	ACM-25	Must add. 4-digit PIN to customer.
Driver info card (name, vehicle, rating)	✓ INCLUDED	—	Shows with masked call button.

9. Profile Tab

CA-15 — Profile Screen

CA-V3-07 — Invoice Preference (v3.0)

CA-15	Profile Screen	✓ INCLUDED	v2.0 + v3.0
-------	----------------	------------	-------------

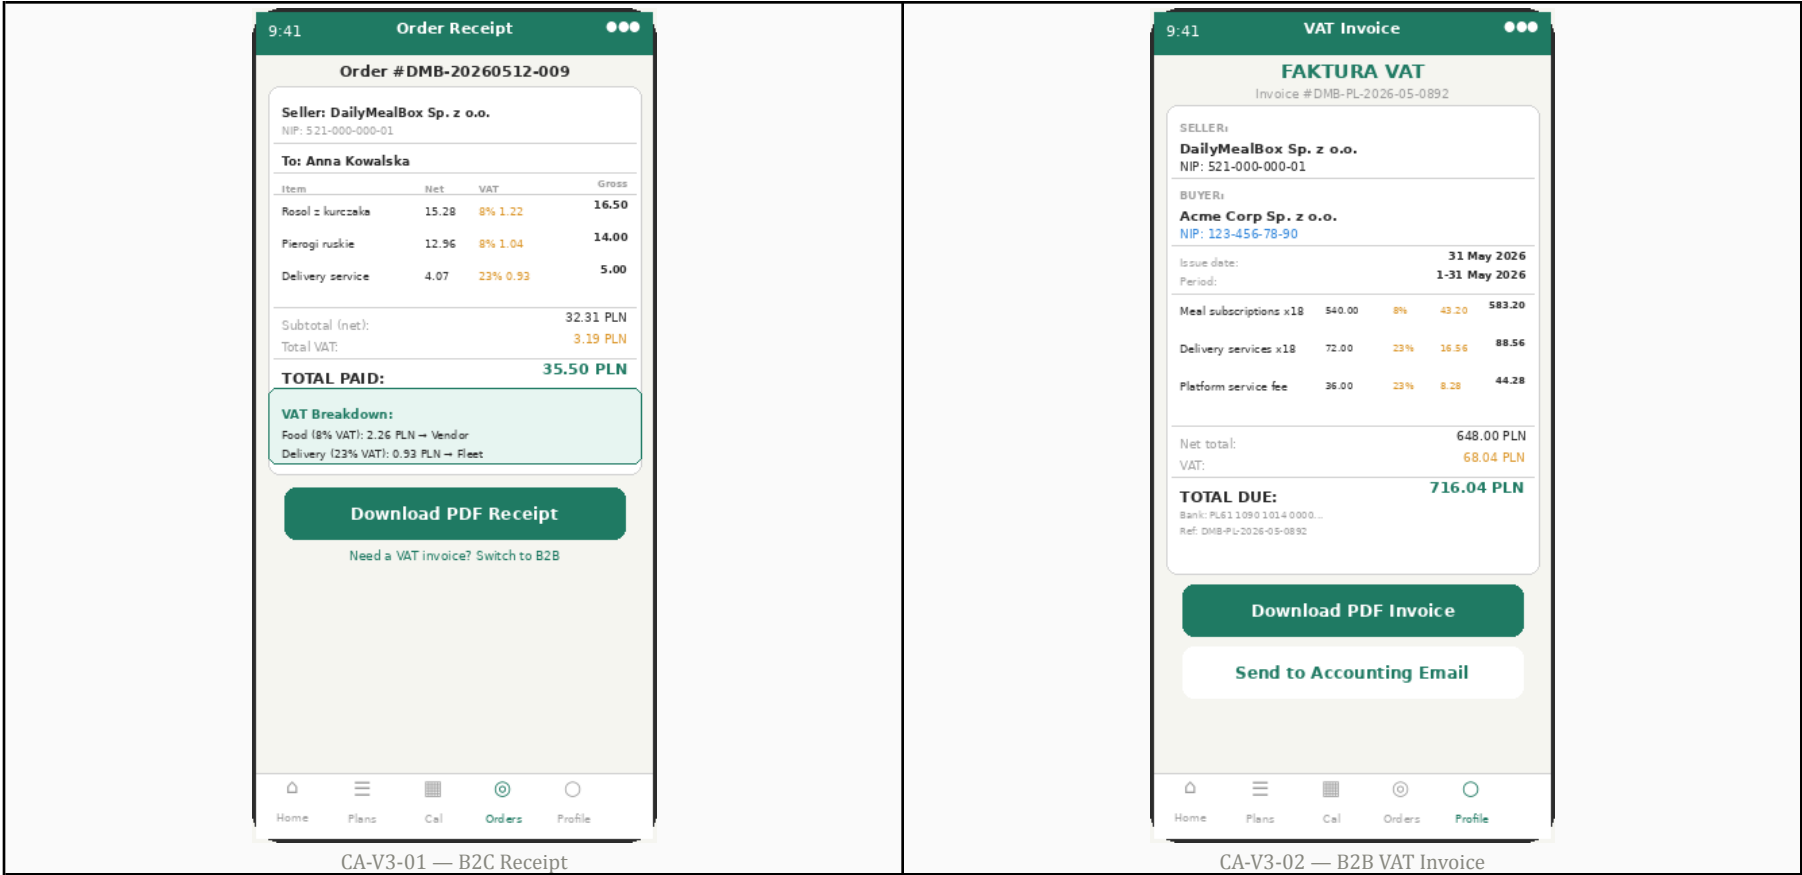

Feature	Status	Admin Control	Notes
Personal info, subscription management	✓ INCLUDED	—	Editable. Plan, schedule, billing date.
Pause + Cancel subscription (easy to find)	⚠ EU LAW	ACM-14/15	EU Consumer Law. Max 2-tap. Cannot hide.

Diet + allergen preferences	✓ INCLUDED	ACM-44/45/46	Updates filtering immediately across app.
Delivery proof preference (PIN / Photo)	✓ INCLUDED	ACM-25	Customer sets. Admin can lock platform-wide.
Payment methods	✓ INCLUDED	ACM-15/16/17	Shows admin-enabled payment types only.
In-app wallet (credits)	✓ INCLUDED	ACM-18	Skip credits + top-up. Hidden if admin disables.
Loyalty points link	✓ INCLUDED	ACM-35	Only shown if loyalty enabled.
Referral programme link	✓ INCLUDED	ACM-37	Only shown if referral enabled.
Invoice preference (Receipt vs B2B VAT Invoice)	✓ INCLUDED	ACM-80	NEW v3.0. Company NIP, billing email. VIES validation.
B2B — Switch to Office Account	✓ INCLUDED	ACM-40	If user has B2B account.
GDPR — Delete my account	✓ INCLUDED	ACM-100	EU Article 17. Must add.

CA-V3-0 7	Invoice Preference Screen	✓ INCLUDED	v3.0
--------------	---------------------------	------------	------

Feature	Status	Admin Control	Notes
Receipt type: Simple vs Full VAT Invoice	✓ INCLUDED	ACM-80	Default: simple receipt. Switching to B2B shows NIP field.
Company name + NIP + billing address + billing email	✓ INCLUDED	—	Used on all future B2B invoices. Validated NIP format.
EU VAT number validation via VIES API	✓ INCLUDED	—	For cross-border EU B2B: validates VAT number is active in EU registry.
Invoice delivery: email + downloadable in-app	✓ INCLUDED	—	Auto-sent to billing email. Also downloadable from Orders tab.

10. Receipt & Invoice Screens

CA-V3-01	B2C Order Receipt	✓ INCLUDED	v3.0
----------	-------------------	------------	------

Feature	Status	Admin Control	Notes
Auto-generated after confirmed delivery	✓ INCLUDED	—	PDF via pdfkit/puppeteer. Email to customer. Available in Orders tab.

Seller: DailyMealBox Sp. z o.o. + NIP	✓ INCLUDED	—	Platform is always invoice issuer. Never vendor or fleet partner.
Gross price per line. VAT rate noted per line.	✓ INCLUDED	—	Simplified receipt — no full VAT breakdown required by EU law for B2C under EUR 100.
VAT summary note (food 8%, delivery 23%)	✓ INCLUDED	—	Educates customer. Not legally required but builds trust.
"Need B2B invoice?" prompt links to invoice preference	✓ INCLUDED	—	Upsell to B2B account for freelancers and small businesses.

CA-V3-0 2	B2B Full VAT Invoice	✓ INCLUDED	v3.0
--------------	----------------------	------------	------

Feature	Status	Admin Control	Notes
Sequential invoice number (DMB-PL-2026-05-XXXX)	✓ INCLUDED	—	Per city per month. Resets monthly. Stored in invoiceSequences collection.
All EU-required fields (Art. 226 EU VAT Directive)	⚠ EU LAW	—	Both NIPs, issue date, service period, line items with net+rate+tax+gross, payment terms.
Separate lines: food (8%) + delivery (23%) + platform fee (23%)	✓ INCLUDED	—	Each line type has its own VAT rate clearly shown.
Reverse charge for EU cross-border B2B	✓ INCLUDED	—	VAT = 0%. Invoice states "Reverse charge — Art. 196 EU VAT Directive."
7-year storage (EU tax law)	⚠ EU LAW	—	Cannot be deleted. Firebase Storage /invoices/ folder. Retention policy enforced.
Monthly auto-generation via CRON (1st of month)	✓ INCLUDED	—	Previous month orders consolidated. Sent to billing email.

B2B Invoice Generation — Monthly CRON

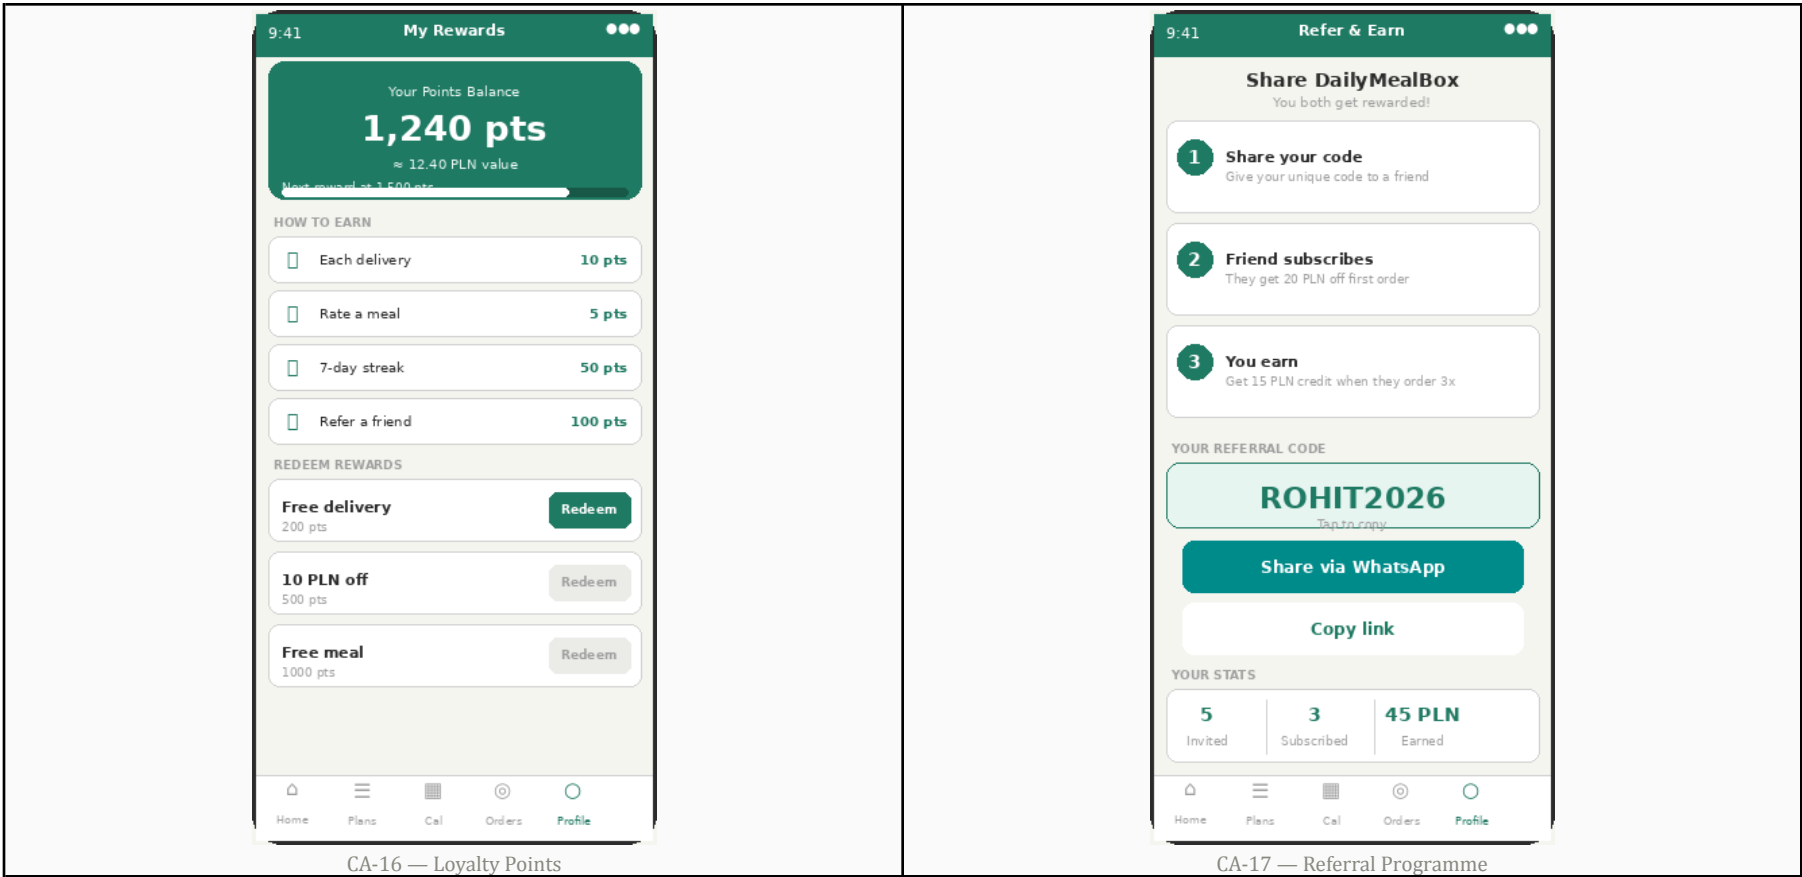

```
// Runs 1st of each month at 06:00 for previous month:
cron.schedule("0 6 1 * *", async () => {
  const companies = await B2BAccount.find({ status: "active" })
  for (const company of companies) {
    const orders = await Order.find({
      company_id: company._id,
      delivery_date: { $gte: startOfLastMonth(), $lte: endOfLastMonth() },
      status: "delivered"
    })
    const invoiceNumber = await getNextInvoiceNumber(company.city)
    const isReverseCharge = isEUCrossBorder(company.vat_number, company.city)
    const foodRate = isReverseCharge ? 0 : VAT_RATES[company.city].food_restaurant
    const deliveryRate = isReverseCharge ? 0 : VAT_RATES[company.city].delivery

    const pdfBuffer = await generateInvoicePDF({
```

```
    invoice_number: invoiceNumber,
    seller: { name:"DailyMealBox Sp. z o.o.", nip: PLATFORM_NIP },
    buyer: { name: company.name, nip: company.vat_number,
            address: company.billing_address },
    line_items: buildLineItems(orders, foodRate, deliveryRate),
    reverse_charge: isReverseCharge,
    payment_terms: "14 days bank transfer"
  })

  const pdfUrl = await uploadToFirebase("/invoices/b2b/"+invoiceNumber+".pdf", pdfBuffer)
  await email.send(company.billing_email, "Invoice "+invoiceNumber, { pdfUrl })
  await Invoice.create({ invoice_number:invoiceNumber, company_id:company._id,
    pdf_url:pdfUrl, status:"sent", retention_until: addYears(now(),7) })
}
}, { timezone: "Europe/Warsaw" })
```

13. OTA Updates & Admin Controls

OTA Update Banner — Appears without reinstall

All 100+ admin controls delivered via Firebase Remote Config (OTA). Admin changes a toggle → Remote Config updated → all installed apps update within 5–15 minutes. No App Store update needed. No reinstall needed. Works across all 3 apps simultaneously.

Key Admin Toggles (Customer App)

Feature	Default	Partial On?	Notes
VAT rate per city (food/delivery/service)	8%/23%/23%	Yes — per vendor type	Admin changes → OTA → checkout recalculates. No code needed.
Weekly/monthly subscriptions	Always ON	No — core product	Cannot disable. Business model foundation.
One-time orders	ON	Per time window	Admin sets acceptance time window per slot.
GPS live tracking	ON	Per city	Admin disables for cities where Maps API cost is too high.
Loyalty points — earn	ON	Yes — earn on, redeem off	Earn-only phase during launch.
Referral programme	ON	No	On or off. Admin sets reward amounts.
Surprise meal box	OFF (Warsaw launch)	Per city	Test in Warsaw, enable in Berlin when ready.
B2B office accounts	ON	No	Admin approves each B2B application.
Flash deals	ON	Yes — on but require approval	Admin approves each vendor deal.
AI recommendations	ON	No	Admin disables if nutrition data coverage is too low.
Churn detection threshold	2 skips/week	Value configurable	Admin sets: how many skips before retention card shows.
Invoice type lock	Customer choice	Yes — lock to one type	Admin can force all customers to use receipt or all to B2B invoice.
