PRODUCT REQUIREMENTS DOCUMENT

Part 4 — Admin Panel+Fleet partner · FINAL

Document	FINAL merged — supersedes all previous Admin Panel versions
Version	Final
Date	27 May 2026
Platform	Web only (responsive — desktop + tablet)
Admin Roles	7 roles: Super Admin · Accountant · Customer Service · City Manager · Marketing Manager · Web Manager · Fleet Manager -Fleet manager - Fleet partner
Brand colours	#1F7A63 Deep Green · #F5F5F0 Soft Beige · #2B2B2B Dark Gray
Developer	Appzeto — Indore, India

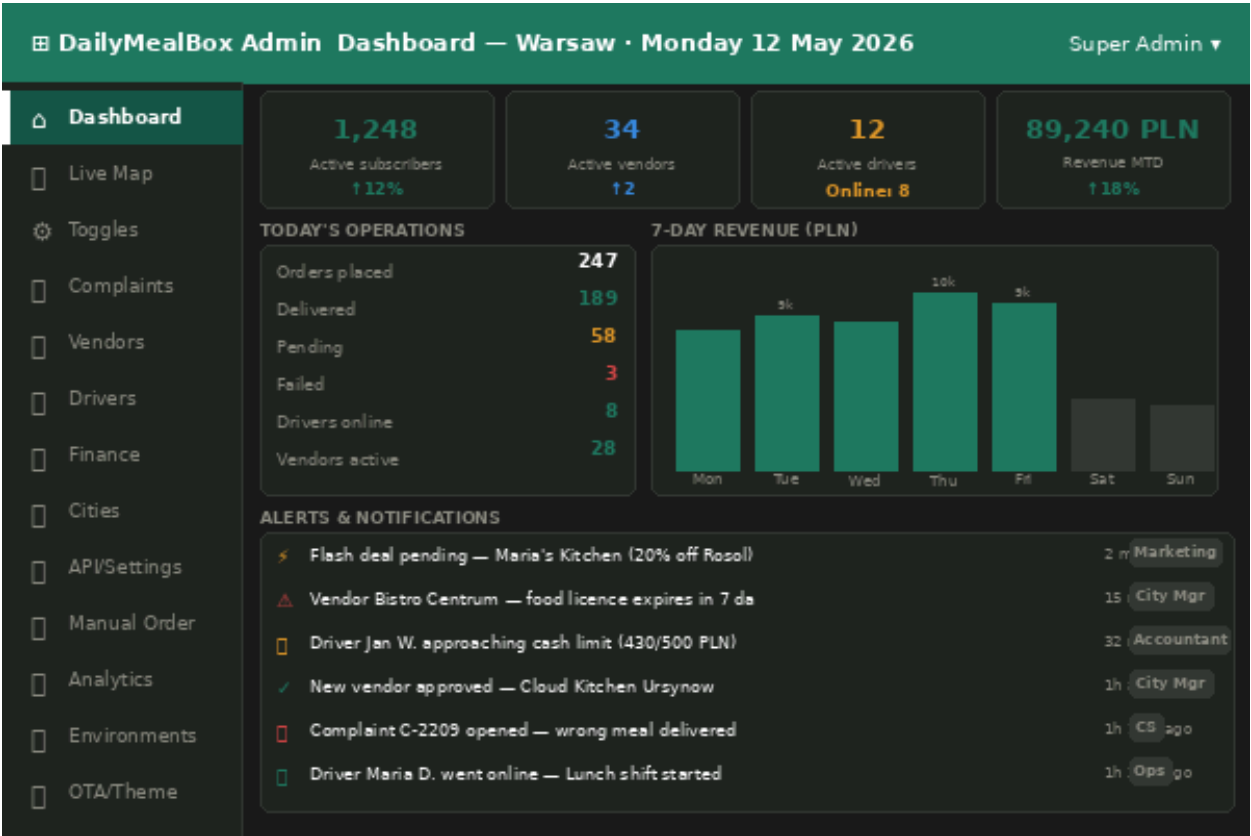

SCOPE: WHAT THE ADMIN PANEL CONTROLS: Every feature toggle across all 4 apps (100 controls), all 7 admin user roles with granular permissions, live operations map, multi-city setup with zone drawing, API integration management, manual order entry, food forecasting, complaint+refund management, batch payouts and cash settlement, driver reassignment, OTA config (theme/language/feature flags), environment management (Dev/QA/Prod), full audit trail of every admin action, fleet partner management, document verification workflow.

1. Admin Roles — 7-Role Permission Matrix

Each role sees ONLY their relevant sections — other sections completely hidden (not just greyed out). Super Admin sees everything. The new Fleet Manager role (v3.0) handles fleet partner onboarding and driver document verification across all cities — this is separate from City Manager who handles zone operations within their city.

Role	Access Level	Can Do	Cannot Do
Super Admin	Full access to everything	All 13 screens. Add cities, manage roles, API keys, OTA releases, 100 feature toggles, all financial data, GDPR deletions, audit log, environment management, driver/vendor suspension, app theme changes, fleet partner management.	Nothing restricted. Only role with API settings and environment management.
Accountant	Finance only	Financial management (payouts, VAT reports, revenue), transaction logs, commission config (view), invoice downloads, cash settlement, fleet partner invoice approval.	Cannot: change orders, approve vendors/drivers, access API, change feature toggles.
Customer Service	Orders + complaints	Customer management (view/block), manual order entry, complaint management, refund issuance up to 150 PLN, support tickets, order history.	Cannot: financial reports, API settings, feature toggles, approve vendors, change commission rates.
City Manager	One assigned city only	Vendor management (approve/reject/suspend in city), driver management (approve/suspend/zone in city), delivery zone management, city-level feature toggles, city analytics.	Cannot: see other cities, financial data, API settings, manage admin users, platform-wide settings.
Marketing Manager	Content + campaigns	Banner management, coupon creation (within discount ceiling), push campaigns, flash deal approval/rejection, referral settings (within budget), seasonal campaigns, loyalty config.	Cannot: financial data, approve vendors/drivers, API settings, user personal data.
Web Manager	Content only	Edit FAQ, help articles, email templates (non-VAT fields), app text content, onboarding tutorial content.	Cannot: any financial, operational, or personal user data. Cannot change feature toggles.
Fleet Manager ★ NEW	Fleet operations (all cities)	Review + approve driver documents (all cities), onboard + approve new fleet partner companies, review fleet partner company documents, process fleet partner invoice approval, monitor document expiry across all fleet partners, generate fleet compliance reports per country.	Cannot: approve vendors, access customer data, change delivery zones, change commission rates, change platform settings, access financial reports.

2. Main Dashboard (AP-01)

AP-01 — Main Dashboard (Super Admin view)

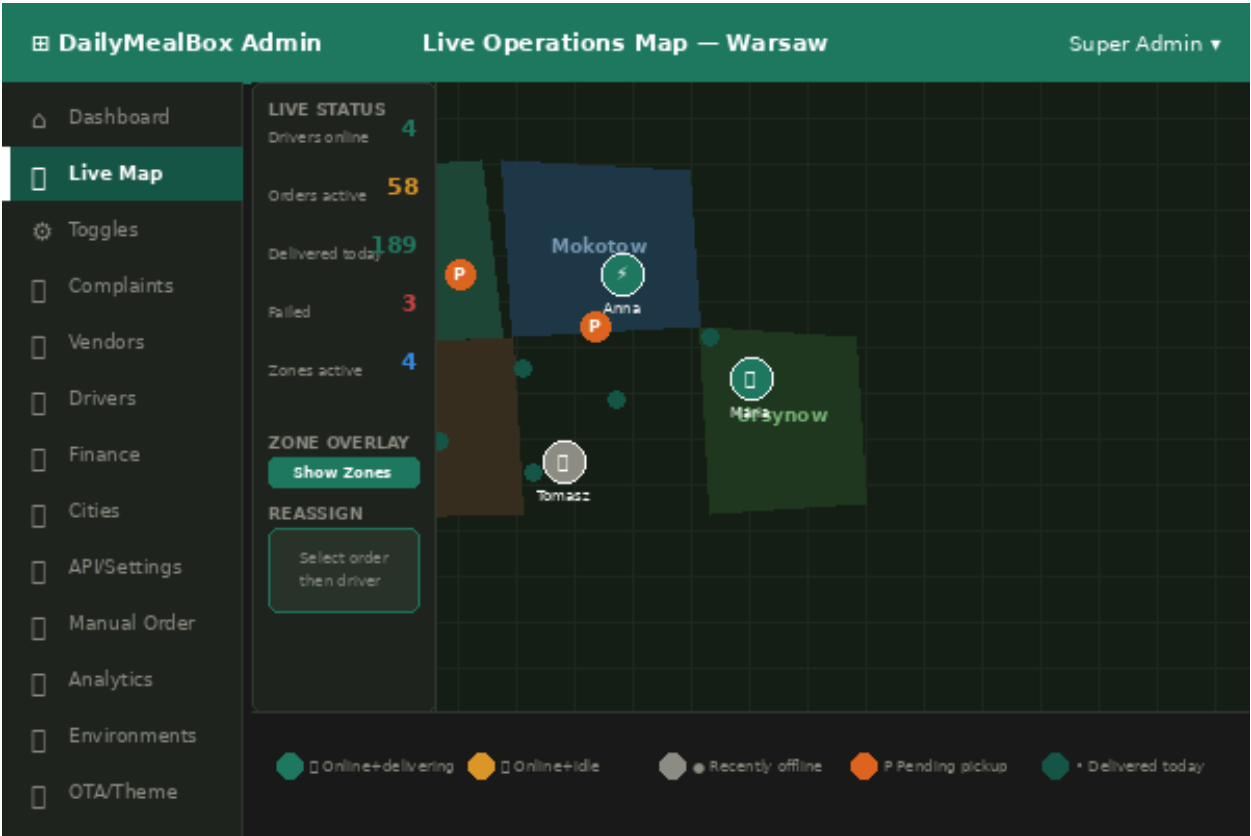

AP-01	Main Dashboard	✓ INCLUDED	All roles (filtered by role)
-------	----------------	------------	------------------------------

Every admin role sees a customised dashboard. Super Admin sees everything. City Manager sees only their city KPIs. CS sees only complaints and pending orders. Marketing sees campaign performance. Fleet Manager sees driver document status and fleet partner activity.

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

KPI cards: subscribers / vendors / drivers / revenue MTD	✓ INCLUDED	Super Admin, City Manager, Accountant	Real-time. City Manager sees own city only. Accountant sees revenue/commission.
Today operations summary (orders / delivered / failed)	✓ INCLUDED	Super Admin, City Manager, CS	Failed in red. CS auto-routed to complaint inbox.
7-day revenue bar chart	✓ INCLUDED	Super Admin, Accountant	Green bars Mon–Fri, gray Sat–Sun. City-filtered.
Fraud alert panel (v3.0)	✓ INCLUDED	Super Admin, CS	NEW. Shows flagged events: duplicate device, card BIN mismatch, GPS mismatch on delivery, high refund rate. CS can dismiss or escalate.
Alerts panel (flash deals, licence expiry, cash limit)	✓ INCLUDED	All roles (filtered)	Super Admin: all alerts. CS: complaints. Marketing: flash deals. City Manager: vendor/driver issues.
City selector dropdown	✓ INCLUDED	Super Admin only	Switch Warsaw/Berlin/Paris. City Manager has fixed city.
Fleet document alerts (v3.0)	✓ INCLUDED	Fleet Manager, Super Admin	Drivers with expiring documents (60-day warning). Fleet partners with pending invoices.

3. Live Operations Map (AP-02)

AP-02 — Live Operations Map (real-time WebSocket)

AP-02	Live Operations Map	✓ INCLUDED	Super Admin, City Manager
-------	---------------------	------------	---------------------------

Real-time operational intelligence via WebSocket. Admin sees all active drivers as moving dots, pending pickups, and completed deliveries. This is how you manage 12 drivers across 4 zones without a single phone call.

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

All active drivers as moving coloured dots	✓ INCLUDED	Super Admin, City Manager	Green = online+delivering. Amber = online+idle. Gray = offline. Updates every 5s.
Pending pickup pins (orange P)	✓ INCLUDED	Super Admin, City Manager	Vendor locations with pending collections. Fades to green when collected.
Completed delivery markers (small green dots)	✓ INCLUDED	Super Admin, City Manager	All deliveries completed today. Click for order detail.
Click driver → full route + stats	✓ INCLUDED	Super Admin, City Manager	Name, vehicle, deliveries, earnings, current status.
Click order → detail + reassign button	✓ INCLUDED	Super Admin, City Manager	Order info, vendor, customer zone, assigned driver. Reassign opens driver picker.
Live stats panel (online / active / delivered / failed)	✓ INCLUDED	Super Admin, City Manager	Numbers update in real-time via WebSocket.
Driver reassignment from map	✓ INCLUDED	Super Admin, City Manager	Select order → Reassign → pick driver → driver app updates instantly → customer + vendor notified.
Zone overlay toggle	✓ INCLUDED	Super Admin, City Manager	Shows delivery zone polygons. Helps visualise zone coverage.

Live Map — WebSocket Architecture

```
// Admin browser connects to admin WebSocket room:
const socket = io(BACKEND_URL)
socket.emit("join_admin_room", { admin_id, city: "warsaw" })

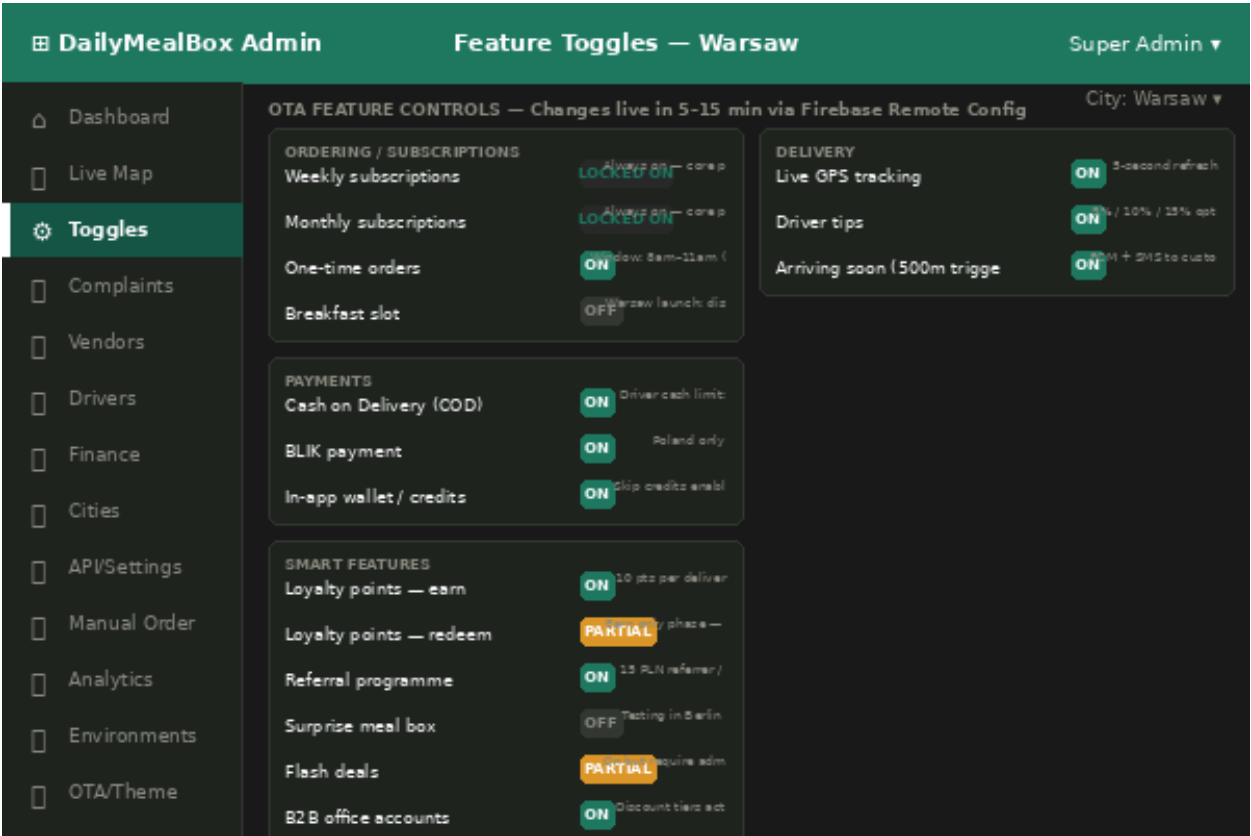

// Backend pushes driver location updates every 5s:
socket.on("all_driver_locations", (drivers) => {
  drivers.forEach(driver => {
    updateDriverMarker(driver.id, driver.lat, driver.lng, driver.status)
  })
})

// On connect: receive full snapshot:
socket.on("operations_snapshot", (data) => {
  data.drivers.forEach(d => renderDriverMarker(d))
  data.pending_pickups.forEach(p => renderPickupPin(p))
  data.completed_today.forEach(c => renderCompletedDot(c))
  updateLiveStats(data.stats)
})

// Driver reassignment:
async function reassignDriver(orderId, newDriverId) {
  await fetch("/api/admin/orders/" + orderId + "/reassign", {
    method: "PATCH",
    body: JSON.stringify({ new_driver_id: newDriverId })
  })
  // Backend: remove from old driver route, add to new driver route,
  // re-optimize new driver route, push to both driver apps,
```

```
// FCM to customer + vendor, update admin map  
}
```

4. Feature Toggles — 100 Admin Controls (AP-03)

AP-03 — Feature Toggles (OTA — no reinstall needed)

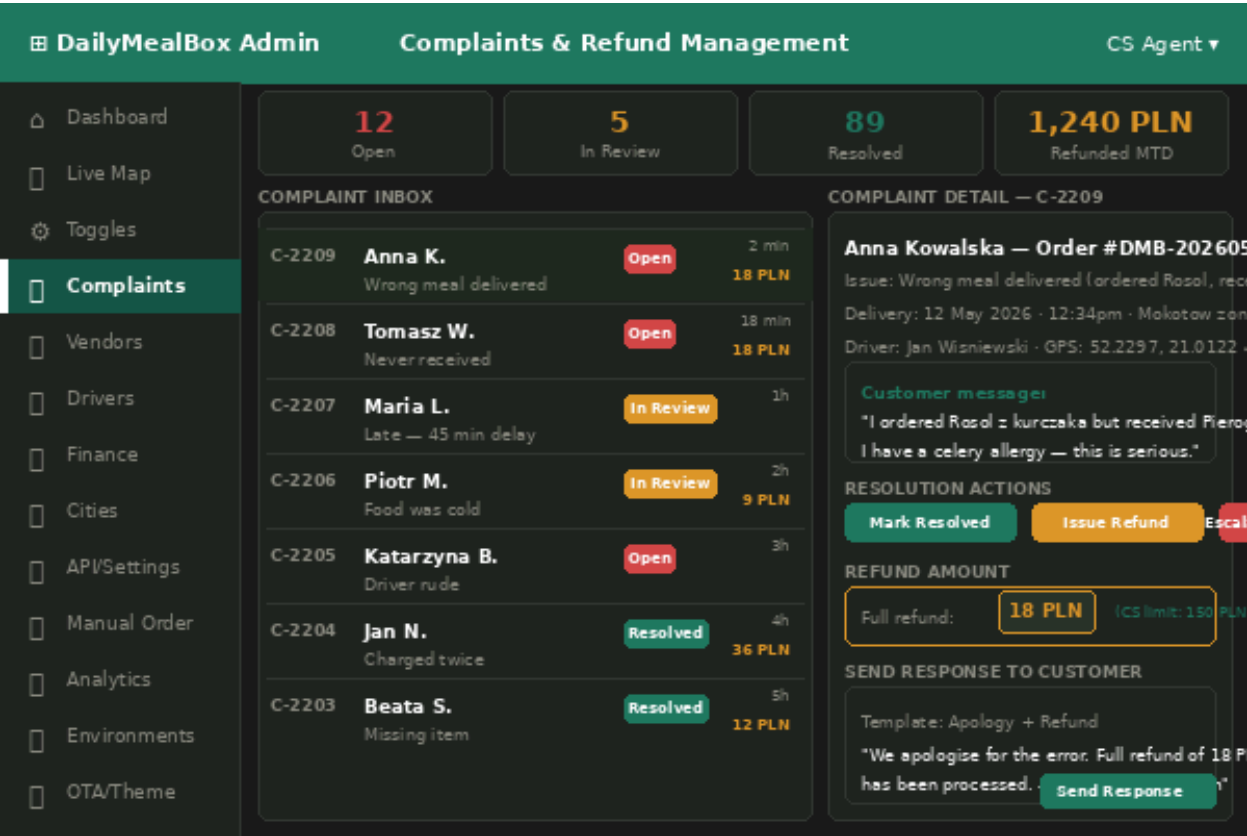

AP-03	Feature Toggles Page	✓ INCLUDED	Super Admin, City Manager (city-scoped)
-------	----------------------	------------	---

Every toggle uses Firebase Remote Config (OTA). Changes go live in 5–15 minutes — no App Store review, no reinstall. Super Admin controls platform-wide. City Manager controls their city only. ON / OFF / PARTIAL states for fine-grained control.

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

City selector at top	✓ INCLUDED	Super Admin	Changes apply to selected city. City Manager sees only their city.
Category grouping (Ordering/Slots/Payments/Smart/Delivery/Driver)	✓ INCLUDED	All	20+ toggles per category. Collapsed by default.
ON / OFF / PARTIAL toggle per feature	✓ INCLUDED	Super Admin, City Manager	Green=ON. Gray=OFF. Amber=PARTIAL (e.g. earn loyalty but not redeem yet).
Change preview before save (high-impact)	✓ INCLUDED	Super Admin	For disabling subscriptions: "This affects X active subscribers. Confirm?"
All changes logged in audit trail (auto)	✓ INCLUDED	Always	Who changed it, previous state, new state, timestamp, reason.
Rollback to previous state (24h window)	✓ INCLUDED	Super Admin	Undo button available for 24 hours after any change.
Scheduled toggle (future datetime)	✓ INCLUDED	Super Admin	Set toggle to change at a specific future time. E.g. "Enable surprise boxes at 9am Monday."
Language management toggle (v3.0)	✓ INCLUDED	Super Admin	Enable/disable language per city. OTA push translation file.

5. Complaint & Refund Management (AP-04)

AP-04 — Complaint Inbox + Refund Actions

AP-04	Complaint & Refund Management	✔ INCLUDED	Customer Service (primary), Super Admin
-------	-------------------------------	------------	---

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

Unified complaint inbox (Open/In Review/Resolved)	✓ INCLUDED	CS, Super Admin	Filter by status, date, city, vendor, driver.
Complaint detail: order info, message, proof photos	✓ INCLUDED	CS, Super Admin	Driver GPS at delivery. Delivery proof photo. Order status timeline.
Resolution: Mark Resolved / Issue Refund / Escalate	✓ INCLUDED	CS (limited), Super Admin	CS issues up to 150 PLN. Above limit: Escalate → Super Admin queue.
Full/partial refund with VAT split (v3.0)	✓ INCLUDED	CS (limited), Super Admin	NEW v3.0. Full refund reverses: vendor clawback + fleet clawback + commission return. Partial = proportional. Each component logged separately for VAT reconciliation.
Complaint status trail (Open → In Review → Resolved)	✓ INCLUDED	CS, Super Admin	Each status change logged with timestamp + admin name. Customer sees update.
Customer response (email + in-app push)	✓ INCLUDED	CS, Super Admin	Template picker + custom message. Sends both simultaneously.
Auto-escalation (4h Open, 24h In Review)	✓ INCLUDED	Super Admin (config)	If not actioned: auto-escalate. Timing configurable.
CS agent refund limit (default 150 PLN)	✓ INCLUDED	Super Admin	Protects against accidental large refunds. Super Admin changes per agent.

6. Vendor Management (AP-05)

DailyMealBox Admin		Vendor Management — Warsaw					Super Admin ▾
Dashboard Live Map Toggles Complaints Vendors Drivers Finance Cities API/Settings Manual Order Analytics Environments OTA/Theme	All (34)		Active (28)	Pending (4)	Suspended (2)	Search vendors...	
	Vendor Name	Type	Zone	Rating	Subs	Commission	Status
	Maria's Kitche	Home Cook	Mokotow	★4.9	34	15%	Active

	Home Cooks Co	Home Cook	Ochota	★4.5	8	15%	Active

AP-05 — Vendor Management Table

AP-05	Vendor Management	✓ INCLUDED	Super Admin, City Manager
-------	-------------------	------------	---------------------------

Feature	Status	Who Can Access	Notes / Logic
Searchable vendor table (All/Active/Pending/Suspended)	✓ INCLUDED	Super Admin, City Manager	City Manager sees own city only. Sortable by name, rating, subscribers, zone.

Vendor profile: details, documents, Google Drive links	✓ INCLUDED	Super Admin, City Manager	Food licence link opens Drive. Expiry colour-coded.
Approve / Reject new vendor applications	✓ INCLUDED	City Manager (primary), Super Admin	Rejection requires reason. Vendor notified by push + email.
Commission rate per vendor (override individual)	✓ INCLUDED	Super Admin only	Accountant view only. "Custom" badge if different from type default.
Instant suspension (Partial or Full mode)	✓ INCLUDED	Super Admin, City Manager	Partial: stops new orders, existing fulfil. Full: halts everything.
Flash deal auto-approve for trusted vendors	✓ INCLUDED	Marketing, Super Admin	Set "auto-approve" for high-rating vendors (skips approval step).
Kitchen Partner assignment per vendor (v3.0)	✓ INCLUDED	Super Admin	NEW. Home cook vendors show which Kitchen Partner they are linked to. Admin assigns on approval.
EU food licence expiry monitoring (30d + 7d alerts)	✓ INCLUDED	City Manager, Super Admin	Auto-suspend on expiry. Push + email to vendor 30 days before.

AP-06 — Driver Management with Fleet Partner Column

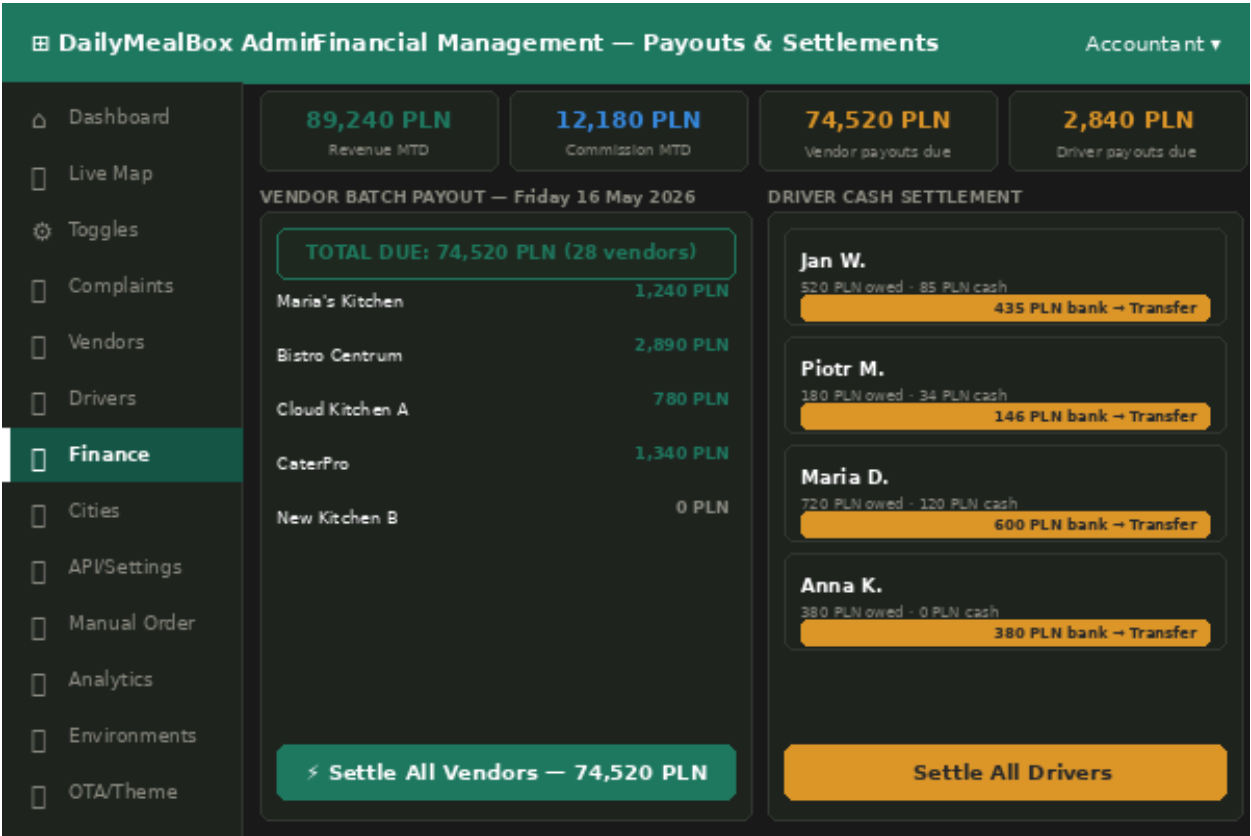

AP-06	Driver Management	✓ INCLUDED	Super Admin, City Manager, Fleet Manager
-------	-------------------	------------	--

- Adds Fleet Partner column to driver table. Every driver shows which fleet partner company they belong to. Fleet Manager role can review and approve documents for drivers across all cities.

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

Driver table: vehicle/zone/shift/deliveries/cash/rating/status	✓ INCLUDED	Super Admin, City Manager	Real-time. Online drivers with green badge. Cash column shows COD balance.
Fleet Partner column (v3.0)	✓ INCLUDED	Super Admin, City Manager, Fleet Manager	NEW. Shows: "Evelstar Sp. z o.o." for each driver. Links to Fleet Partner management.
Zone assignment (assign driver to 1+ zones)	✓ INCLUDED	City Manager, Super Admin	Map picker or checkbox. Driver notified. Takes effect on next app open.
Shift assignment (lunch/dinner/both)	✓ INCLUDED	City Manager, Super Admin	Changes allowed online hours. Driver app enforces automatically.
Document review: Approve/Reject/Request Re-upload (v3.0)	✓ INCLUDED	Fleet Manager, Super Admin	NEW 3-state workflow per document. Each state logged. Driver notified by FCM.
Driver reassignment (emergency)	✓ INCLUDED	City Manager, Super Admin	Select undelivered orders from absent driver. Assign to available driver.
Cash limit configuration per driver	✓ INCLUDED	Accountant, Super Admin	Default 500 PLN. Alert at 80%. Links to driver profile.
Minimum guarantee config (per shift per city)	✓ INCLUDED	City Manager, Super Admin	Set PLN amount. Platform tops up if driver earns less.
Bonus programme config	✓ INCLUDED	Marketing, Super Admin	Delivery target + bonus amount + validity. Driver sees progress bar.

8. Financial Management (AP-07)

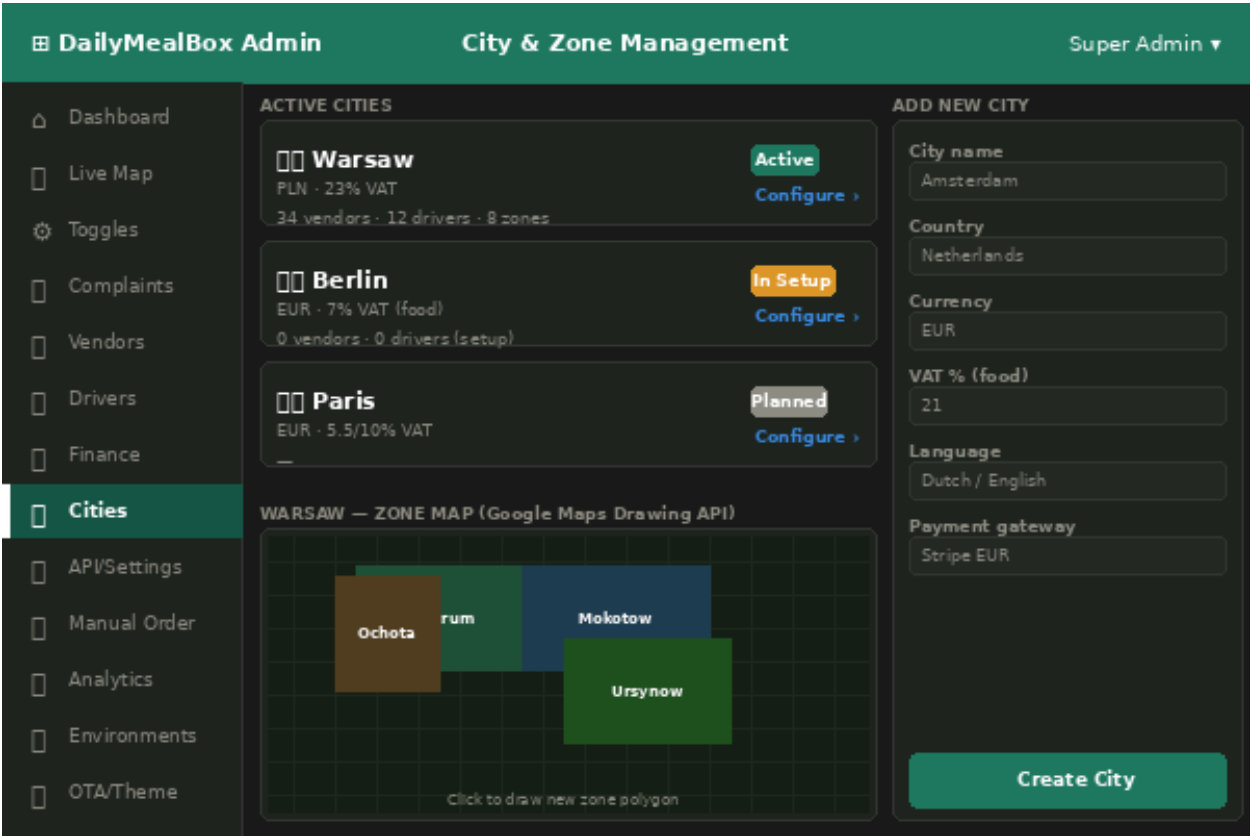

AP-07 — Financial Management (Batch Payout + Cash Settlement)

AP-07	Financial Management	✓ INCLUDED	Accountant (primary), Super Admin
-------	----------------------	------------	-----------------------------------

Feature	Status	Who Can Access	Notes / Logic
Revenue KPIs: MTD revenue / commission / vendor due / driver due	✓ INCLUDED	Accountant, Super Admin	Real-time. City-filtered.

Batch vendor payout — "Settle All" button	✓ INCLUDED	Accountant, Super Admin	One click settles all pending withdrawals via Przelewy24. Shows total before confirming.
Driver cash settlement (netting logic)	✓ INCLUDED	Accountant, Super Admin	Gross owed minus cash held = bank transfer amount. Admin marks cash received. Logged.
Fleet partner invoice processing (v3.0)	✓ INCLUDED	Accountant, Super Admin	NEW. Fleet partner submits weekly invoice via Fleet Portal. Accountant reviews and approves. Triggers Przelewy24 bank transfer to fleet partner.
VAT report by invoice type (v3.0)	✓ INCLUDED	Accountant, Super Admin	NEW. Separate VAT reporting: (1) Customer invoices VAT (output), (2) Fleet partner invoices VAT (input — deductible), (3) Vendor commission VAT. All three affect DailyMealBox net VAT position. Export CSV.
Refund split tracking (v3.0)	✓ INCLUDED	Accountant, Super Admin	NEW. When refund issued: system tracks vendor clawback + fleet clawback + commission return separately. Each component in VAT report.
Payment processing fee tracking (v3.0)	✓ INCLUDED	Accountant, Super Admin	NEW. Przelewy24 ~1.5-2% per transaction tracked separately. Shows in P&L report as platform cost.
Transaction log (all financial movements)	✓ INCLUDED	Accountant, Super Admin	Filterable by date, vendor, driver, type. CSV export.
Invoice management (resend, download, 7-year storage)	✓ INCLUDED	Accountant, Super Admin	EU tax law: 7-year mandatory storage.

9. City & Zone Management (AP-08)

AP-08 — City Management + Zone Drawing

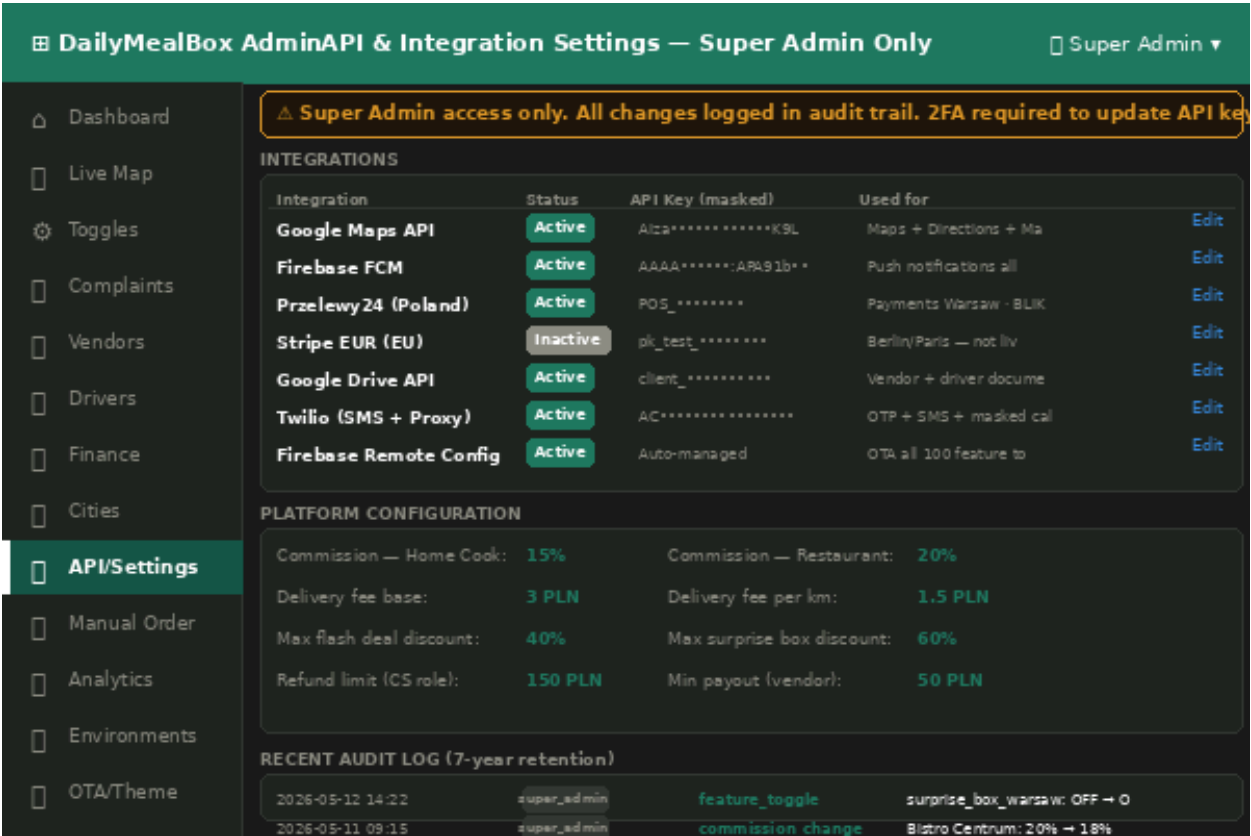

AP-08	City & Zone Management	✓ INCLUDED	Super Admin only
-------	------------------------	------------	------------------

Super Admin adds new cities directly from admin panel — no developer needed. Each city has its own currency, VAT rate, language, payment gateways, delivery zones, and feature toggle state. City inactive until checklist complete.

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

City list with status (Active/In setup/Planned)	✓ INCLUDED	Super Admin	Warsaw: Active. Berlin: In setup. Paris: Planned.
Add new city (full config form)	✓ INCLUDED	Super Admin	Name, country, currency, VAT%, language, payment gateway. No developer needed.
City activation checklist	✓ INCLUDED	Super Admin	Must have: ≥ 1 approved vendor, ≥ 1 approved driver, ≥ 1 zone drawn, gateway configured, language uploaded.
Zone drawing (interactive map — GeoJSON polygons)	✓ INCLUDED	Super Admin, City Manager	Google Maps Drawing API. Draw polygon → name → colour → store as GeoJSON in MongoDB.
Language upload + validation + OTA push	✓ INCLUDED	Super Admin	Upload i18n JSON → validate all keys present → approve → OTA push to all apps in city within 15 min.
VAT rate per city (OTA — no code change)	✓ INCLUDED	Super Admin	Admin sets → Remote Config updated → all new transactions use new rate. History keeps old rate.
Payment gateway per city	✓ INCLUDED	Super Admin	Warsaw: Przelewy24. Berlin/Paris: Stripe EUR. Toggle active/inactive per city.
Currency per city	✓ INCLUDED	Super Admin	PLN for Warsaw, EUR for Berlin/Paris. Cannot change for active city without data migration.

10. API & Integration Settings (AP-09)

AP-09 — API Settings (Super Admin Only)

AP-09	API & Integration Management	SUPER ADMIN	Super Admin only — never visible to other roles
-------	------------------------------	-------------	---

RESTRICTED: Completely hidden from all roles except Super Admin. Every change logged in audit trail. Changing API keys requires 2FA confirmation. 7-year audit log retention (EU compliance).

Feature	Status	Who Can Access	Notes / Logic
---------	--------	----------------	---------------

Integration status table (Google Maps/FCM/Przelewy24/Stripe/Drive/Twilio/RC)	✓ INCLUDED	Super Admin	Status badge. Masked API key (first 4 chars). Edit button.
Update API keys in-panel (no code change needed)	✓ INCLUDED	Super Admin	2FA confirmation required. Previous key masked in audit log.
Toggle integration on/off	✓ INCLUDED	Super Admin	E.g. disable SMS (Twilio): falls back to push notifications only.
Platform config (commission/fees/discount limits)	✓ INCLUDED	Super Admin	All numeric configs in one place. Changes OTA-applied.
Admin user management (create/edit/deactivate)	✓ INCLUDED	Super Admin	Add new admin, set role, set city scope (City Manager). Deactivate instantly.
Full audit log (7-year EU compliance)	✓ INCLUDED	Super Admin	Filter by admin, action, date, section. Export CSV.
OTA release approval (Prod)	✓ INCLUDED	Super Admin	QA: auto. Prod: explicit Super Admin approve required.

AP-10 — Manual Order Entry (4-step CS flow)

AP-10	Manual Order Entry	✓ INCLUDED	Customer Service, Super Admin
-------	--------------------	------------	-------------------------------

Feature	Status	Who Can Access	Notes / Logic
Step 1: Search customer by phone or name	✓ INCLUDED	CS, Super Admin	Shows subscription status, zone, saved addresses, payment methods.

Step 2: Select vendor + meal (zone-filtered)	✓ INCLUDED	CS, Super Admin	Shows today meals, prices, remaining portions. Only vendors in customer zone.
Step 3: Delivery details (type/date/address/payment)	✓ INCLUDED	CS, Super Admin	Subscription or one-time. Use saved card or mark as COD.
Step 4: Agent notes (internal only)	✓ INCLUDED	CS, Super Admin	Free text. Not shown to customer. E.g. "Elderly — cannot use app."
VAT displayed on order summary (v3.0)	✓ INCLUDED	CS, Super Admin	NEW. Shows: 18 PLN + 1.44 PLN VAT (8%) = 19.44 PLN total before confirming.
Order created same as customer-placed order	✓ INCLUDED	—	Same workflow: vendor notified, driver assigned, customer push + SMS.
CS agent identified on order record	✓ INCLUDED	—	"placed_by: agent_name [CS]" for audit trail.

12. Analytics & Reports (AP-11)

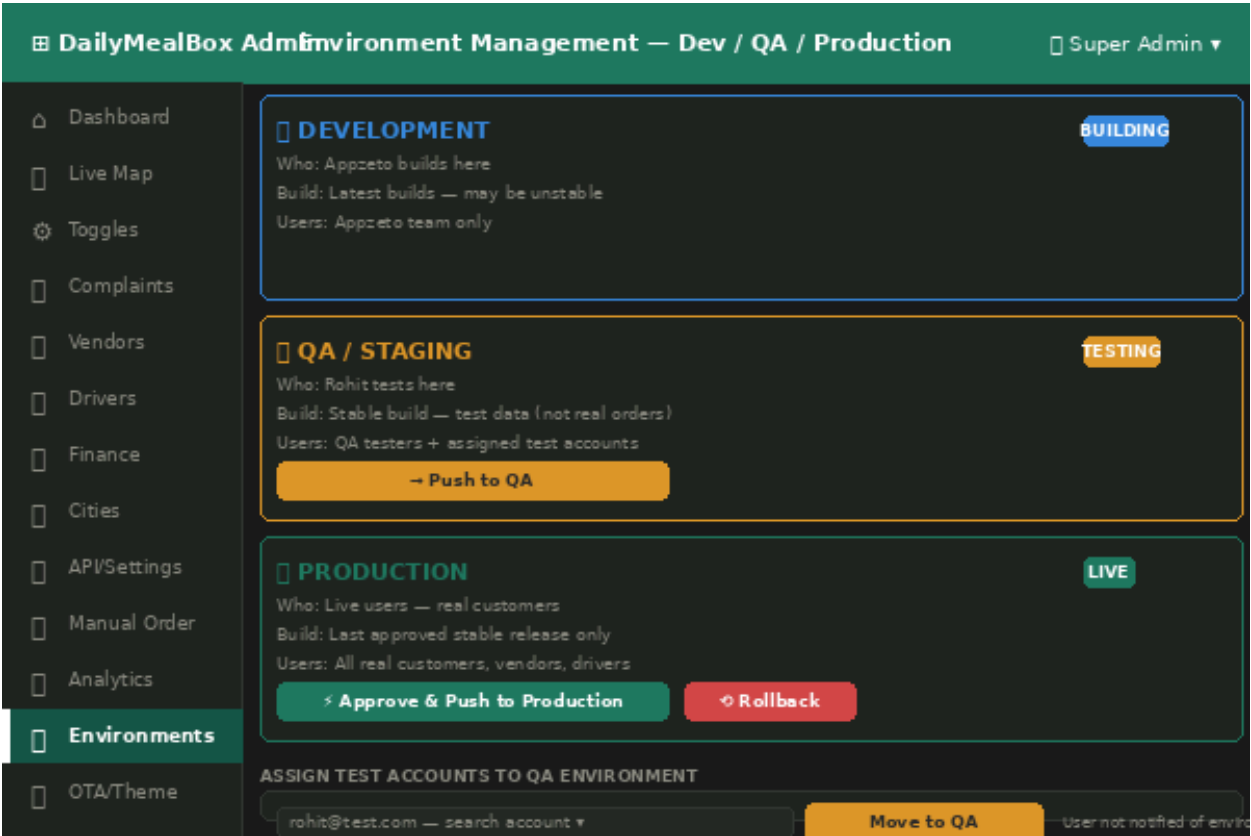

AP-11 — Analytics Dashboard

AP-11	Analytics & Reports	✔ INCLUDED	Super Admin, Accountant, City Manager, Marketing
-------	---------------------	------------	--

Feature	Status	Who Can Access	Notes / Logic
Period selector: Today / Week / Month / All time	✔ INCLUDED	All roles	Consistent period across all charts.
Subscriber KPIs: count / churn / retention / avg rating	✔ INCLUDED	Super Admin, City Manager, Marketing	Marketing uses for campaign ROI.

Subscriber growth chart (8-week trend)	✓ INCLUDED	Super Admin, City Manager, Marketing	Line chart.
City comparison (Warsaw vs Berlin vs Paris)	✓ INCLUDED	Super Admin only	City Manager cannot see other cities.
Vendor performance table	✓ INCLUDED	Super Admin, City Manager	Sortable. Click vendor → go to management page.
Delivery efficiency (on-time % / failed % / avg time)	✓ INCLUDED	Super Admin, City Manager	Per driver and per zone.
Revenue + commission trends	✓ INCLUDED	Accountant, Super Admin	Growth rate. Projection.
Food forecasting admin view (zone-level)	✓ INCLUDED	City Manager, Super Admin	Tomorrow expected orders per zone. "240 Rosol portions needed in Mokotow."
Marketing campaign performance	✓ INCLUDED	Marketing Manager	Coupon ROI, referral conversion, loyalty economics, flash deal ROI.
Report export (CSV / PDF)	✓ INCLUDED	Accountant, Super Admin	Per report, per period, per city.

13. Environment Management (AP-12)

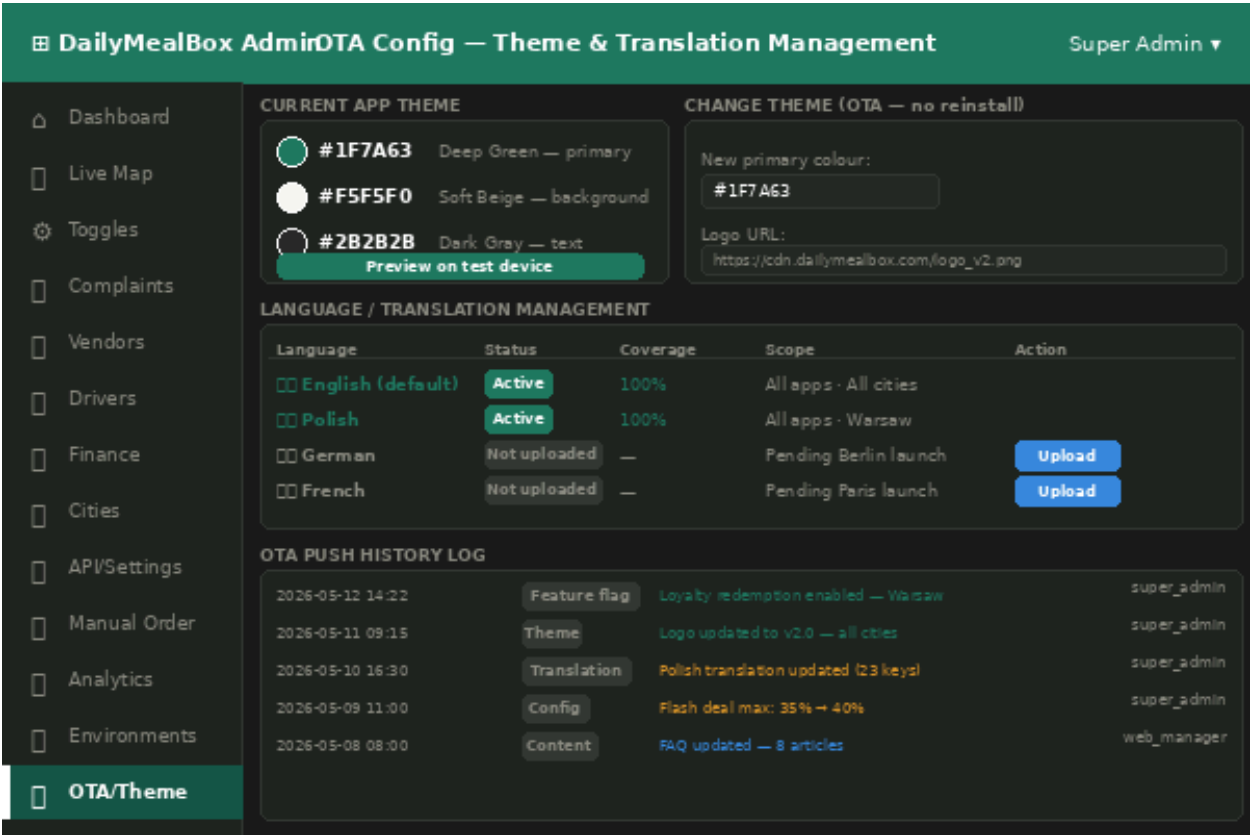

AP-12 — Environment Management (Dev/QA/Prod)

AP-12	Environment Management	🔑 SUPER ADMIN	Super Admin only
-------	------------------------	---------------	------------------

Feature	Status	Who Can Access	Notes / Logic
3 environment overview: Dev / QA / Production	✅ INCLUDED	Super Admin	Each shows: current build, who uses it, status badge, OTA button.

Development	✓ INCLUDED	Super Admin	Appzeto builds here. Latest (may be unstable). Appzeto team only.
QA / Staging	✓ INCLUDED	Super Admin	Stable build. Test data. Testers + assigned test accounts.
Production	✓ INCLUDED	Super Admin	Live users — all real. Last approved stable release. Only Super Admin pushes to Prod.
Assign accounts to QA for testing	✓ INCLUDED	Super Admin	Search email → move to QA → user sees test data. Switch back when done.
Feature flag per environment (3 independent states)	✓ INCLUDED	Super Admin	E.g. Loyalty ON in Dev/QA, OFF in Prod. Promote QA→Prod with one click.
OTA release approval (Prod)	✓ INCLUDED	Super Admin	Explicit approve required for Production. QA: auto on each push.
Rollback any environment (24h window)	✓ INCLUDED	Super Admin	One-click rollback. Logged in audit trail.

14. OTA Config — Theme & Translation (AP-13)

AP-13 — OTA Config, Theme & Language Management

AP-13	OTA Config — Theme & Translation	✔ INCLUDED	Super Admin (theme), Marketing + Web Manager (content)
-------	----------------------------------	------------	--

Feature	Status	Who Can Access	Notes / Logic
Current app theme display (3 brand colours)	✔ INCLUDED	Super Admin	Shows hex codes. Preview swatch.
Change app theme (logo + colours) → OTA push	✔ INCLUDED	Super Admin	No reinstall. Preview on test device. Confirm → Firebase RC → all apps in 5-15 min.

Rollback theme (24h window)	✓ INCLUDED	Super Admin	If theme causes issues: one-click rollback.
Language list: upload / status per city	✓ INCLUDED	Super Admin	English: default. Polish: active. German: pending. French: pending.
Translation file validation	✓ INCLUDED	Super Admin	System checks all keys present vs English master. Shows missing keys. Blocks incomplete uploads.
OTA push history log	✓ INCLUDED	Super Admin	All pushes: timestamp, type, description, pushed by, environments.
Content OTA (FAQ/help/banners/emails)	✓ INCLUDED	Web Manager, Marketing	Web Manager updates FAQ. Marketing updates banners. Immediate OTA push on save.
Scheduled OTA push (v3.0)	✓ INCLUDED	Super Admin, Marketing	Queue theme or feature flag change for future datetime. Campaign launches.

15. Language Management — How It Works

No developer needed to add a new language. Admin uploads a JSON translation file → system validates → OTA push to all apps in that city. Apps fetch on open + every 2 hours. New language live within 15 minutes of admin approval.

15.1 Adding a New Language — Step by Step

Step	Action	Detail
1	Prepare translation file	Translator creates de.json (German) following the English master format. Every key from en.json must be present.
2	Upload in Admin Panel	Admin Panel → AP-13 → Languages → Upload → select de.json → select city: Berlin.
3	System validates	Backend checks: all keys present vs English master, no empty values, correct JSON format. Shows missing keys if any.
4	Admin approves	If validation passes: Admin clicks "Approve & Push". Firebase Remote Config updated with translation URL.
5	OTA push to apps	All apps in Berlin fetch new config on next open (or within 2h background refresh). Translation applied immediately — no reinstall needed.
6	User sees language	Customer, vendor, and driver apps in Berlin now show German text. User can still override in their Profile settings.

15.2 Translation File Format

i18n JSON Format — Example (Polish pl.json)

```
// File: pl.json — Polish translation for Warsaw
// Must contain EVERY key from en.json (master file)
// Admin uploads this in AP-13 → Languages → Upload

{
  "onboarding": {
    "welcome_title": "Twój cotygodniowy posiłek, zautomatyzowany",
    "welcome_subtitle": "Zamów tygodniowy lub miesięczny plan posiłków",
    "goal_eat_healthy": "Zdrowe jedzenie",
    "goal_save_time": "Oszczędność czasu",
    "goal_family": "Posiłki rodzinne",
    "goal_fitness": "Fitness"
  },
  "home": {
    "next_delivery": "Następna dostawa",
    "track_live": "Śledź na żywo",
    "skip_delivery": "Pomiń dostawę",
    "pause_subscription": "Wstrzymaj subskrypcję"
```

```

    },
    "calendar": {
      "locked": "Zamówienia zamknięte",
      "skip_limit_reached": "Wykorzystano {count}/{max} pominięć w tym miesiącu"
    },
    "notifications": {
      "arriving_soon": "Kierowca przybywa za ~{minutes} min. PIN: {pin}",
      "delivered": "Dostarczono! Smacznego. Oceń swoje doświadczenie →",
      "payout_processed": "{amount} PLN przelane na Twoje konto bankowe."
    }
  }
  // ... all other keys matching en.json exactly
}

// Backend validation:
const masterKeys = getAllKeysRecursive(require("../locales/en.json"))
const uploadedKeys = getAllKeysRecursive(uploadedJSON)
const missingKeys = masterKeys.filter(k => !uploadedKeys.includes(k))
if (missingKeys.length > 0) {
  return error({ missing: missingKeys, count: missingKeys.length })
  // Admin sees: "23 missing keys: onboarding.goal_fitness, ..."
}

// On approval: upload to Firebase Storage + update Remote Config:
const url = await firebase.storage().upload("/translations/pl.json", jsonBuffer)
await remoteConfig.updateTemplate({
  parameters: { "translation_pl": { defaultValue: { value: url } } }
})
// All Polish-language apps fetch new translation on next open

```

16. Complete Feature Matrix — Admin Panel FINAL

FINAL DOCUMENT: This is the final document in the DailyMealBox PRD series. Together with Parts 1, 2, 3, and 4a, this completes the full product specification across all 5 apps (Customer, Vendor, Driver, Admin Panel, Fleet Portal). The push notification catalogue in Section 2 is the single authoritative reference for all notifications — Appzeto should use this for their FCM integration plan.

17. Fleet Partner Portal · Push Notifications

1. Fleet Partner Portal — Architecture & Access

Fleet Partner Portal is NOT a separate web application. It lives at `admin.dailymealbox.com/fleet` — same domain, same hosting, separate login flow and completely restricted UI. Fleet partner companies (Evelstar, Natviol, City Drive) log in here to manage their driver roster, upload documents, and generate invoices. They CANNOT approve or verify drivers — only the Fleet Manager admin role can do that.

1.1 Two Separate Logins — Same Domain

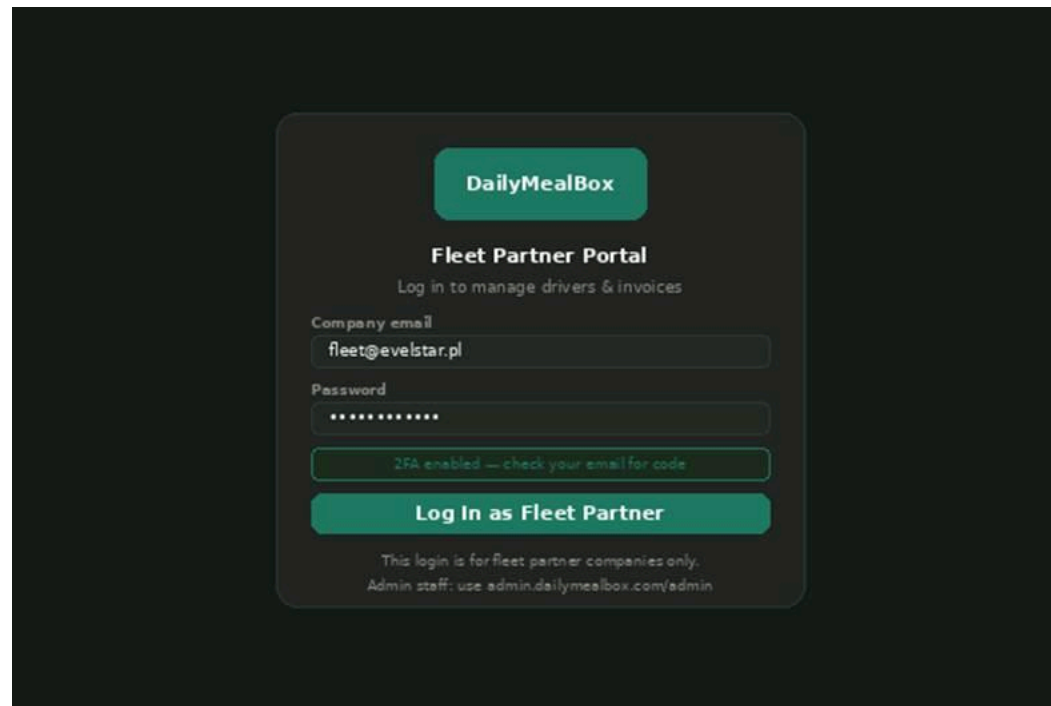

Aspect	Fleet Manager (Admin Role)	Fleet Partner (External Login)
Who is this?	DailyMealBox employee	External fleet company (Evelstar, Natviol etc.)
Login URL	<code>admin.dailymealbox.com</code> (admin panel)	<code>admin.dailymealbox.com/fleet</code>
Login method	Email + password + 2FA (same as other admin roles)	Email + password + 2FA (separate auth)
What they see	Full fleet management section: all drivers, all fleet partners, document review queue, compliance reports	Only their own data: their drivers, their documents, their invoices, their earnings
Can approve drivers?	YES — core responsibility	NO — upload only, Fleet Manager approves
Can see other fleet partners?	YES — all partners across all cities	NO — strictly their company only

Can change platform settings?	NO — view + document actions only	NO — upload and invoice only
Number of logins	One per DailyMealBox staff member	One or more per fleet company (staff accounts)

1.2 Fleet Partner — What They Can and Cannot Do

✓ Fleet Partner CAN DO	✗ Fleet Partner CANNOT DO
✗ Add drivers to their roster ✗ Upload driver documents (licence, ID, vehicle reg, insurance) ✗ See their own driver list and document status (approved/pending/rejected) ✗ See weekly deliveries completed by their drivers (breakdown per driver) ✗ Generate weekly invoice to DailyMealBox (pre-filled from delivery data) ✗ Download past invoices and track payment status ✗ See driver earnings breakdown per driver (for their own payroll) ✗ Submit support tickets to Fleet Manager ✗ Update company bank details ✗ Add staff accounts for their company	✗ Approve or verify any driver (Fleet Manager only) ✗ See other fleet partners data ✗ See customer information of any kind ✗ Access vendor information ✗ Change anything in the DailyMealBox platform ✗ Access admin panel features ✗ See driver GPS locations or live map ✗ Change delivery zones or shift schedules ✗ Change commission rates or platform settings ✗ See financial reports beyond their own invoices

2. Fleet Partner Screens (5 screens + login)

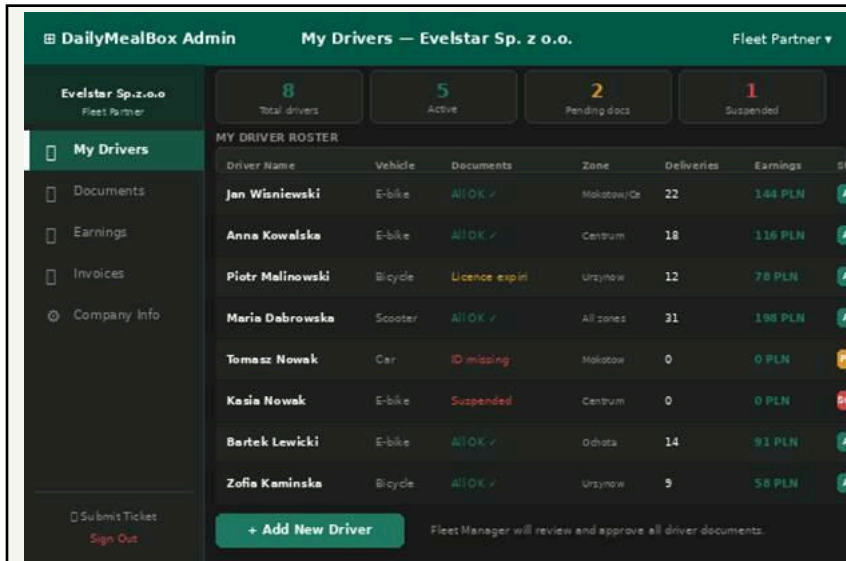

The screenshot shows a login interface for the DailyMealBox Fleet Partner Portal. At the top, there is a green logo with the text "DailyMealBox". Below it, the title "Fleet Partner Portal" is displayed, followed by the subtitle "Log in to manage drivers & invoices". The login form consists of two input fields: "Company email" with the value "fleet@evelstar.pl" and "Password" with masked characters. Below the password field, a green button indicates "2FA enabled — check your email for code". At the bottom of the form is a large green button labeled "Log In as Fleet Partner". A footer note states: "This login is for fleet partner companies only. Admin staff: use admin.dailymealbox.com/admin".

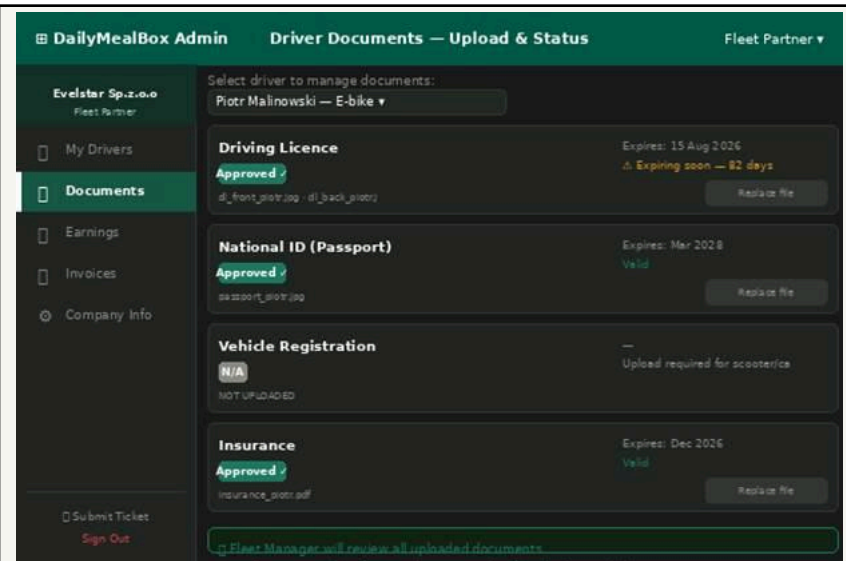

Fleet Partner Login — admin.dailymealbox.com/fleet

FP-Login — Fleet Partner Login Screen

Completely separate from admin staff login. Fleet partner companies see a clean login form branded for their role. 2FA mandatory. After login they see only their restricted dashboard — no admin panel features visible at all.

FP-01 — My Drivers (roster + status)

FP-02 — Document Upload & Status

FP-01 — My Drivers

Fleet partner sees their complete driver roster with document status, deliveries, earnings and active status. Can add new drivers. Cannot approve drivers — that is the Fleet Manager role. The "Fleet Manager will review" note is always visible so fleet partners understand the workflow.

Feature	Who Does It	Notes
View all their drivers with status (Active/Pending/Suspended)	Fleet Partner	Real-time. Document status colour-coded: green=ok, amber=expiring, red=missing.
Add new driver to roster	Fleet Partner	Creates driver application. Fleet Partner then uploads documents. Fleet Manager reviews.
See deliveries and earnings per driver this week	Fleet Partner	Used to calculate their own driver payroll. Data comes from DailyMealBox delivery records.
See document expiry warnings	Fleet Partner	60-day warning amber. 30-day red. Links to Document Upload screen.

Cannot approve or activate drivers	Fleet Manager ONLY	Fleet partner uploads docs, Fleet Manager reviews and approves. Clear separation.
------------------------------------	---------------------------	---

FP-02 — Document Upload & Status

Fleet partner uploads all driver documents here. Each document shows its current review status: Pending Review, Approved, Rejected (with reason), or Expiring. Fleet partner cannot see what criteria Fleet Manager uses for approval — they just upload and wait for notification.

Document Type	Required For	Fleet Partner Action	Fleet Manager Action
Driving Licence (front + back)	All vehicle types	Upload JPG/PDF. Can replace when renewed.	Review validity, check expiry date, approve or reject with reason.
National ID (passport or national ID)	All drivers (EU compliance)	Upload front photo.	Verify identity document is valid EU ID.
Vehicle registration	Scooter and car drivers only	Upload registration document.	Verify vehicle matches stated type.
Vehicle insurance	Scooter and car drivers only	Upload insurance certificate with expiry.	Check coverage type and expiry date.
Driver contract (signed)	All drivers	Upload signed mandate/B2B contract.	Confirm contract signed and compliant.

FP-03 — Driver Earnings

FP-04 — Invoice Generation & Payment

FP-04 — Invoice Generation & Payment

FP-03 — Driver Earnings Breakdown

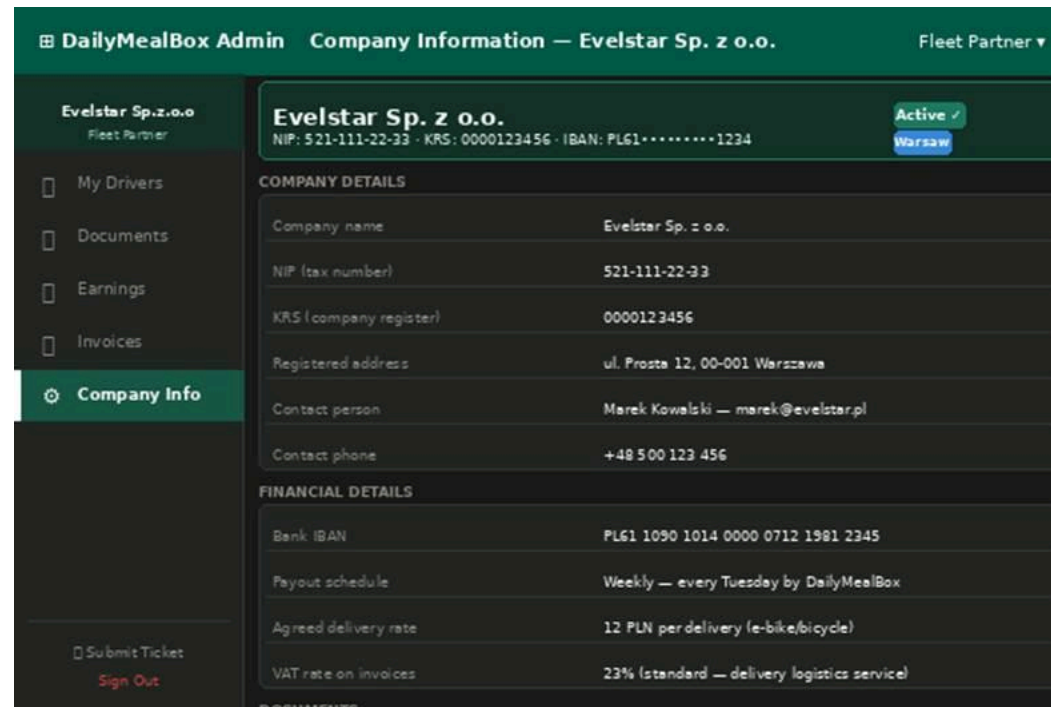

Fleet partner sees weekly earnings per driver — number of deliveries, gross delivery fees, tips, total. This is the data they use to calculate their own driver payroll. DailyMealBox pays the fleet partner gross total. The fleet partner then pays individual drivers per their own contracts (minus their commission, ZUS, tax etc.).

FP-04 — Invoice Generation & Payment Tracking

Fleet partner generates their weekly invoice to DailyMealBox directly from the portal. The invoice is pre-filled with delivery data — no manual entry needed. Fleet partner clicks Generate, reviews the numbers, submits. Accountant in admin panel AP-07 reviews and approves. Payment processed via Przelewy24.

Step	Who	Action	Timing
------	-----	--------	--------

1	Fleet Partner	Clicks "Generate Invoice" for the week. System pre-fills: deliveries count, gross delivery service (PLN), VAT 23%, total amount.	Every Friday after shifts complete
2	Fleet Partner	Reviews pre-filled invoice. If correct: clicks Submit. Invoice goes to DailyMealBox Accountant queue.	Same Friday
3	Accountant	Sees invoice in AP-07 Financial Management. Reviews delivery numbers against system records. Clicks Approve.	Friday or Monday
4	DailyMealBox	Przelewy24 bank transfer initiated. Fleet partner receives payment. Invoice marked Paid in portal.	By Tuesday (weekly cycle)
5	Fleet Partner	Downloads paid invoice PDF. Uses for their own accounting and VAT filing.	After payment confirmed

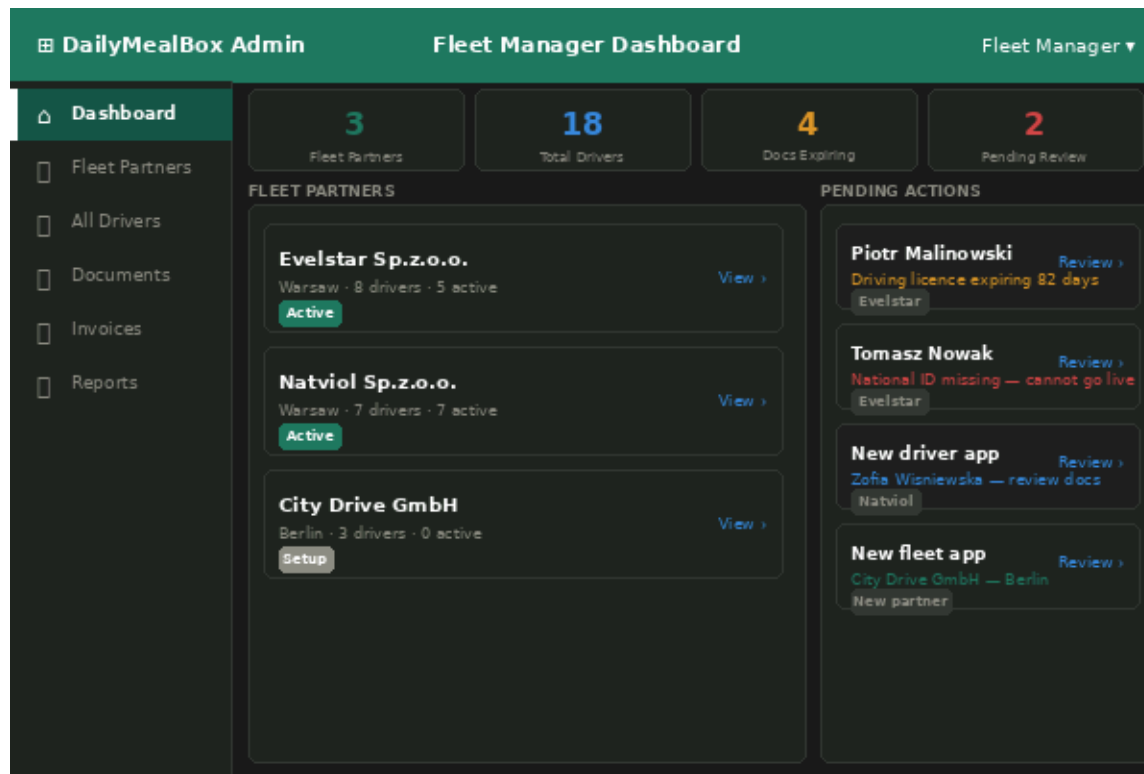

FP-05 — Company Information

FP-05 — Company Information

Fleet partner manages their company details, bank IBAN, and company documents here. Bank account changes require Fleet Manager re-verification before taking effect. All changes logged.

3. Fleet Manager Screens (3 screens inside Admin Panel)

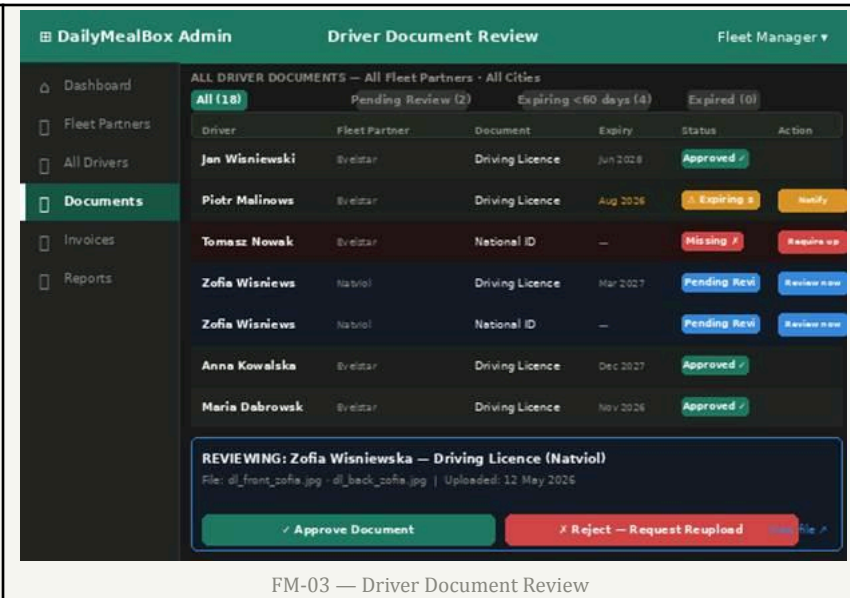

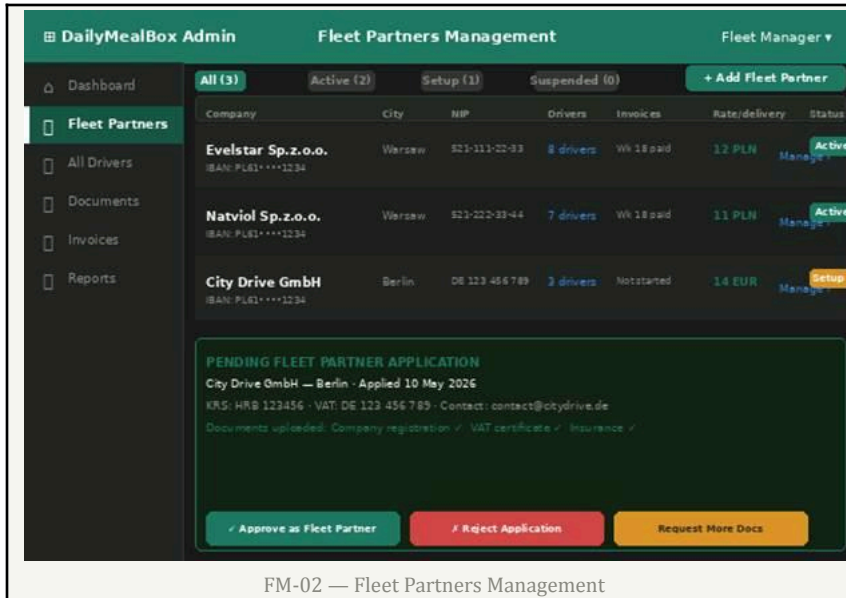

These screens are visible only to the Fleet Manager admin role and Super Admin. Fleet Manager is a DailyMealBox employee who handles all driver document verification and fleet partner onboarding across all cities. Unlike City Manager (one city only), Fleet Manager sees all cities.

FM-01 — Fleet Manager Dashboard

FM-01 — Fleet Manager Dashboard

Fleet Manager command centre. Shows all fleet partners at a glance, pending actions (documents to review, new applications), and document expiry calendar. All alerts are actionable — clicking routes directly to the relevant review screen.

FM-02 — Fleet Partners Management

Fleet Manager sees all fleet partner companies across all cities. Can approve new fleet partner applications (after reviewing company registration, VAT cert, insurance). Can suspend fleet partners. Can see invoice history per partner. This is the master view of the entire fleet partner ecosystem.

Fleet Manager Action	Result	Who is Notified
Approve new fleet partner application	Fleet partner gets login credentials. Can start adding drivers.	Fleet partner company (email with login link)
Reject fleet partner application (with reason)	Application rejected. Reason stored. Fleet partner can resubmit.	Fleet partner company (email with rejection reason)
Suspend active fleet partner	All their drivers suspended immediately. No deliveries possible.	Fleet partner + all their drivers (FCM + email)
Approve driver document	Driver document status → Approved. If all docs approved: driver can go live.	Fleet partner (email) + Driver (FCM push)
Reject driver document (with reason)	Document status → Rejected. Fleet partner must upload new document.	Fleet partner (email) + Driver (FCM push with reason)
Request document reupload	Document status → Needs Reupload. Fleet partner alerted.	Fleet partner (email) + Driver (FCM push)

FM-03 — Driver Document Review

The most used Fleet Manager screen. Shows all driver documents across all fleet partners and all cities in one unified queue. Pending Review documents are highlighted. Fleet Manager clicks Review → sees file → Approve or Reject with reason. All decisions logged with timestamp and Fleet Manager name.

4. Master Push Notification Catalogue — All 4 Apps

This is the single authoritative reference for all push notifications across all 4 apps. Total: 52 notification types. Appzeto must implement FCM for all of these. Notifications marked "Cannot disable" are legally required or operationally critical — admin cannot turn them off from the admin panel.

4.1 Customer App Notifications (14 types)

App	Trigger	Notification Text	Recipient	Channel	Admin Control
Customer	Order confirmed	Your order is confirmed! Delivery: tomorrow 12–1pm. Vendor: Maria's Kitchen.	Customer	FCM+Email	ACM-27 — can disable promo, not transactional
Customer	Order Out for Delivery	Your DailyMealBox is on the way! Jan W. is delivering. ~12 min away. PIN: 7234	Customer	FCM+SMS	Cannot disable — delivery critical
Customer	Arriving soon (500m trigger)	Driver is ~4 min away. Have your PIN ready: 7234	Customer	FCM+SMS	ACM-24 — trigger distance configurable
Customer	Delivered	Delivered! Enjoy your meal. Rate your experience →	Customer	FCM Push	ACM-27 — can disable
Customer	Delivery failed	Delivery attempted. We could not reach you. Tap to arrange reattempt or refund.	Customer	FCM+SMS	Cannot disable — EU consumer law

Customer	Tomorrow menu preview	Tomorrow: Rosol z kurczaka from Maria's Kitchen. Skip or change? →	Customer	FCM Push	ACM-30 — time configurable per maker type
Customer	Skip confirmed + credit	Skip confirmed. 18 PLN credit added to your wallet.	Customer	FCM Push	ACM-27 — can disable
Customer	Refund processed	Refund of 18 PLN has been processed. Arrives in 3-5 business days.	Customer	FCM+Email	Cannot disable — financial
Customer	Churn retention offer	We miss you! 3+ skips detected. Tap for a special offer just for you.	Customer	FCM Push	ACM-37 — threshold configurable
Customer	New flash deal near you	Maria's Kitchen — 20% off Rosol until 2pm today! Only 5 portions left.	Customer	FCM Push	ACM-41 — can disable
Customer	Gift subscription received	You have received a DailyMealBox gift subscription! Tap to redeem.	Customer	FCM+Email	Cannot disable
Customer	Loyalty points earned	You earned 10 points! Total: 340 points. 160 more for a free delivery.	Customer	FCM Push	ACM-35 — can disable
Customer	Referral reward earned	Your friend subscribed! 15 PLN credit added to your wallet.	Customer	FCM Push	ACM-37 — can disable
Customer	Invoice/receipt ready	Your May invoice is ready to download. 34 deliveries, 612 PLN.	Customer	FCM+Email	Cannot disable — financial

4.2 Vendor App Notifications (19 types)

App	Trigger	Notification Text	Recipient	Channel	Admin Control
Vendor	Application approved	Your kitchen is live! Welcome to DailyMealBox. Tap to complete menu setup.	Vendor	FCM+Email	Cannot disable

Vendor	Application rejected	Application not approved. Reason: [reason]. Tap to resubmit.	Vendor	FCM+Email	Cannot disable
Vendor	New subscriber joined	New subscriber! Anna K. from Centrum joined your plan.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Subscriber cancelled	A subscriber cancelled. Check analytics for retention tips.	Vendor	FCM Push	ACM-27 — can disable
Vendor	New one-time order	New order from Centrum! Piotr M. ordered Rosol for tomorrow lunch.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Tomorrow forecast ready	Tomorrow: 19 orders expected. Rosol x14, Pierogi x10. Tap to see plan.	Vendor	FCM Push	ACM-30 — time configurable
Vendor	Cutoff approaching (2h)	Lunch cutoff in 2 hours (10:00). Accept orders and prepare your kitchen.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Driver assigned for pickup	Jan W. (e-bike) arrives ~11:45 for 22 boxes. Have PIN ready.	Vendor	FCM Push	Cannot disable — ops critical
Vendor	Batch collected by driver	Batch A collected by Jan W. at 11:52. PIN verified.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Flash deal approved	Your flash deal is live! Rosol 20% off until 14:00 today.	Vendor	FCM Push	Cannot disable
Vendor	Flash deal rejected	Flash deal rejected. Reason: [reason]. Edit and resubmit.	Vendor	FCM Push	Cannot disable
Vendor	Payout processed	2,480 PLN sent to your bank account. Arrives by next business day.	Vendor	FCM+Email	Cannot disable — financial
Vendor	Food licence expiring (30 days)	EU food licence expires in 30 days. Upload renewal to avoid suspension.	Vendor	FCM+Email	Cannot disable — legal
Vendor	Food licence expired — suspended	Account suspended: licence expired. Upload renewal to reactivate.	Vendor	FCM+Email	Cannot disable — legal

Vendor	Customer complaint filed	A customer complaint was filed for order #DMB-009. CS team reviewing.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Subscriber skip	Anna K. skipped tomorrow. Update your preparation count.	Vendor	FCM Push	ACM-27 — can disable
Vendor	Vacation mode activated	Vacation active 15-22 Jul. 34 subscribers paused and notified.	Vendor	FCM+Email	Cannot disable — auto
Vendor	Kitchen returns from vacation	Welcome back! Your subscription resumes today. 19 orders expected.	Vendor	FCM Push	Cannot disable — auto
Vendor	Commission rate changed	Your commission rate updated to 18%. Effective next billing cycle.	Vendor	FCM+Email	Cannot disable — financial

4.3 Driver App Notifications (15 types)

App	Trigger	Notification Text	Recipient	Channel	Admin Control
Driver	Application approved	Welcome! You are approved. First shift Monday. Tap to see your schedule.	Driver	FCM+Email	Cannot disable
Driver	Application rejected	Not approved. Reason: [reason]. Tap to resubmit documents.	Driver	FCM+Email	Cannot disable
Driver	New order assigned	New delivery! Pickup: Maria's Kitchen (Mokotow). 5 boxes. Tap to navigate.	Driver	FCM Push	Cannot disable — ops critical
Driver	Route updated (reassignment)	3 new deliveries added to your route. Route re-optimised. Tap to see.	Driver	FCM Push	Cannot disable — ops critical

Driver	Vendor ready for pickup + PIN	Maria's Kitchen ready! 8 boxes. Collection PIN: 7842. Tap to navigate.	Driver	FCM Push	Cannot disable — ops critical
Driver	Cash COD limit reached	Cash limit: 500 PLN reached. Contact admin before next COD delivery.	Driver	FCM Push	Cannot disable — financial safety
Driver	Cash COD approaching 80%	Cash balance: 400 PLN (80% of 500 PLN limit). Contact admin soon.	Driver	FCM Push	ACM-73 — can disable
Driver	Bonus milestone unlocked	Bonus unlocked! 150 PLN added. 30 deliveries completed this week.	Driver	FCM Push	ACM-71 — can disable
Driver	Shift starting reminder (30 min)	Lunch shift starts in 30 min (11:00). Go online when ready in your zone.	Driver	FCM Push	ACM-76 — can disable
Driver	Payout processed	720 PLN sent to bank. Cash netted: 85 PLN. Bank transfer: 635 PLN.	Driver	FCM+Email	Cannot disable — financial
Driver	Driving licence expiring (60 days)	Driving licence expires in 60 days. Upload renewal to avoid suspension.	Driver	FCM+Email	Cannot disable — legal
Driver	Licence expired — suspended	Account suspended: licence expired. Upload renewal to reactivate.	Driver	FCM+Email	Cannot disable — legal
Driver	Document approved	Your [document] has been approved. Account remains active.	Driver	FCM Push	Cannot disable
Driver	Document rejected — reupload	Your [document] was rejected. Reason: [reason]. Please upload again.	Driver	FCM Push	Cannot disable
Driver	Admin force-offline	You have been taken offline by admin. Reason: [reason]. Contact support.	Driver	FCM Push	Cannot disable — safety

4.4 Admin / Internal Notifications (4 types)

App	Trigger	Notification Text	Recipient	Channel	Admin Control
Admin	Flash deal pending approval	Vendor Maria's Kitchen submitted a flash deal: Rosol 20% off. Review now.	Marketing Manager, Super Admin	Email only	Cannot disable — ACM-41
Admin	Vendor food licence expiring	Bistro Centrum food licence expires in 7 days. Action required.	City Manager, Super Admin	Email only	Cannot disable — legal
Admin	Driver cash limit alert	Driver Jan W. approaching cash limit (430/500 PLN). Review needed.	Accountant, Super Admin	Email only	ACM-73 — can disable
Admin	Complaint auto-escalated	Complaint C-2209 not actioned in 4 hours. Auto-escalated to Super Admin.	Super Admin	Email only	ACM-04 — timing configurable

4.5 Notification Summary

App	Total Notifications	Cannot Disable	Notes
Customer App	14	5 (delivery chain + refund + gift)	Remaining 9 can be toggled per type in ACM-27
Vendor App	19	8 (approval + driver assigned + payout + licence + commission)	11 can be disabled by admin
Driver App	15	8 (order assigned + vendor ready + payout + docs + force-offline)	7 can be disabled by admin
Admin (internal)	4	2 (flash deal + licence expiry)	Email only — no FCM
TOTAL	52	23 cannot disable	29 admin-configurable via ACM-27
